About our program

The construction industry is expanding much faster than the workforce. This insures that from skilled craft persons to upper project and company managers the wages are increasing and the opportunity for employment and rapid growth in employment is available.

Those willing to take the challenge and develop the skill required to excel in the construction field will be richly rewarded both financially and personally.

Job Opportunities/Potential Earnings....

- Craftsperson \$14-30 per hour with ample overtime
- Project manager \$75,000 per year
- Retail and wholesale sales of construction materials and equipment \$50,000+ per year
- Many jobs include generous benefits, health insurance, retirement, and life insurance

Points of Pride

- Industry experienced faculty – experienced from craft positions through management
- Small class size
- High placement rate
- Modern shop, current technology
- Engaged advisory board
- Articulated program with four- year schools
- Excellent travel opportunities and various work settings
