

HOW TO MOVE ITEMS IN MOODLE

1. Turn on editing

START HERE! (QM 1.1)

The screenshot shows a Moodle course page with editing tools enabled. A list of items is displayed, each with a move icon (a square with a cross) and other editing icons. Red circles highlight the move icons for 'Class Announcements', 'Biol_1010_syllabus_2010', and 'Course Schedule'. Red arrows point from a text box to these icons. The text box contains the instruction: 'Click and hold your left mouse button to move these to the correct position within your class.' Below the list, there is a 'Discussion Introduction' section with a 'Click on "Introduction Activity" below to introduce yourself to your classmates and instructor.' instruction, followed by an 'Introduction Activity (QM 1.5)' item and a 'Course Schedule' item. At the bottom, there are two buttons: 'Add a resource' and 'Add an activity'.

Click and hold your left mouse button to move these to the correct position within your class.

2. This is the move icon, Click and hold your left mouse button to move items
