The Psychology Program at Casper College

Psychology is among the most popular academic programs, both at Casper College and nationwide. The reasons are simple: It's a wide ranging field that explores one of the world's most fascinating subjects---behavior and mental processes. It's also an preparatory pre-professional area with countless potential career opportunities .

Many students choose psychology as a major or minor field of study because they want to pursue eventual graduate training in psychology or a related field. Others want to show employers that they are interested in people and interpersonal skills. Still others find that psychology is an excellent compliment to majors such as addictionology, sociology, social work, biology, health professions, business and communicating arts.

At Casper College, you work with professors who are experienced scholars, practitioners, and researchers. Small classes, hands on experience and personal attention ensure you receive a quality education. Casper college's Psychology faculty and course offerings are among the best that a community college can offer.

Casper College offers Associates degree in Psychology that include core courses in psychological research as well as content areas such as human sexuality, forensic, developmental, biological, social and clinical psychology. Casper college also offers an addictionology degree that combines courses in psychology and addictionology. Our degree in psychology also gives you the foundation to teach high school psychology.

Casper college Psychology graduates succeed at high level in bachelor's degree programs and can even continue for the Bachelor's degree in Psychology at the UW-Casper College program. Our graduates have an excellent record of being placed in masters and doctoral programs in psychology and related programs such as counselor education. Whatever their career choices, our students think highly of their experiences with the Psychology Program at Casper College.
