

**Casper College
Respiratory Care Program
Clinical Observation**

To: All Respiratory Care Program Applicants

Name:_____

Before you commit considerable resources of time, money and effort in the study of Respiratory Care you should observe Respiratory Therapists in action in a clinical setting. When doing a clinical observation at WMC each student will need to stop by the HR Reception desk (at least 1 week prior to their observation) to complete the Non-Employee Packet and provide required documentation. In addition to completing the packet in HR, they will need to provide:

- A Driver's License
- Immunizations (TB within the last year, MMR, Hep B, and Varicella (or verification of Chicken Pox during childhood)).

After the above is done--call 577-2580... input pager 576... submit your phone # and the respiratory therapy charge therapist will call you back. ...introduce yourself and tell them you would like to schedule an observation shadow.

Date of visit:_____

Facility Name:_____

Therapists Name/Credentials:_____
