

Casper College accepts records that are legitimate and legible. Records must verify the date of immunization or titer test for the vaccination of measles, mumps and rubella (MMR). Records do not have to be sent directly from a physician.

What if I cannot find my immunization records?

If you do not have your own immunization records and documents, locating records can be difficult. Please consider checking for your records with any of the following:

Previous Employer

Previous high school, middle school, or elementary school

Parents and relatives

State Archives

In Wyoming contact:
