Points of Pride

• All students enrolled in the Casper College Athletic Training Program receive hands-on, clinical experience, beginning with their first semester in the program.

• All students enrolled in the athletic training program work closely with Casper College Athletics and are on the sidelines during games and practices.

• Students are exposed to a variety of athletic training settings, including college athletics, high school athletics, and physical therapy clinics.

• The course work and clinical experiences at Casper College provides students with substantial knowledge and skills, which prepare them to highly excel when they transfer to an accredited four-year program.

• Athletic training students at Casper College are taught many of the 300+ proficiencies required to become a certified athletic trainer.

• The athletic training faculty at Casper College have a large variety of skills and experiences, which benefit students in the classroom and during clinical instruction.

• Transfer agreement with the University of Montana so that students can earn a master’s degree in athletic training following two years at Casper College and three years at UM.

### Former and Current Students:

#### What students are saying:
- “Going through the Casper College Athletic Training Program put me ahead of the curve.”

- “My continuing education has been made much easier after going through the Athletic Training Program at Casper College because of the great instruction and clinical time with the instructors.”

- “This program has been my base support for all my continuing education thanks to the great instructors.”

- “This is a very hands-on program, which really helps my learning.”

- “We learn a lot in the classroom and I really like that we get to take that information and use it in practice at our clinical sites.”

### Recent Graduates are now attending:
- University of Northern Colorado
- New Mexico State University
- Metropolitan St.
- Midwestern St. University
