Course Description: Introduces students to the mechanics of farm/ranch computerized record keeping, and its use as a management tool. The laboratory exercises are actual problems in farm and ranch management and record keeping.

Statement of Prerequisites: None

Goal: The student will gain an understanding of the development and fundamentals of farm/ranch record keeping and its application in managerial decisions. Students will realize the vital importance of accurate record keeping and its relevance in financial management, business analysis and decision making. This knowledge is useful in a variety of business related disciplines.

Outcomes: The student will be expected to solve problems using critical thinking and creativity when entering a years’ worth of data from the case ranch that is provided to the student. After successfully entering the data, the students will be able to provide an accurate income statement and balance sheet to the instructor. They will also use quantitative analytical skills to evaluate the financial condition of the operation when using these financial statements and be able to demonstrate how to identify strengths and weaknesses within that operation.

Course Objectives: The successful student will be able to define accounting terms and explain how apply them in QuickBooks. After entering a year of data they will be able to develop the financial statements and analyze the data and develop a plan to help improve the financial condition of the operation and justify those changes.

Methodology:
This course is designed to be an online course with lab exercises to be completed on your computer. Discussion forum participation will be very essential to fully understand record keeping, and its purpose and importance on the farm/ranch. The lab work is essential so the student can learn how to keep records efficiently and accurately.

Evaluation Criteria: Your grade in the course will be assigned based on the percentage of the total points you earn.
