CASPER COLLEGE COURSE SYLLABUS
CHEM 1006 – Basic Chemistry Laboratory I

Semester/Year: Spring 2016

Lecture Hours: 0  Lab Hours: 3  Credit Hours: 1

Class Time: Sec. 1 8:00-10:50, Days: Tuesday, Monday, Room: PS 304
Sec. 2 13:00-15:50 (1:00-3:50) Tuesday, and Thursday
PM), Sec. 3 13:00-15:50 (1:00-3:50), Sec. 4 8:00-10:50.

Instructor’s Name: Mark Mehn, Ph.D.

Instructor's Contact Office Phone: (307) 268-2370 Email: mmehn@caspercollege.edu
Information: PS311

Office Hours: Mondays, Wednesdays, Thursdays, and Fridays from 12:00-12:50, and Fridays from
13:00-13:50 (1:00-1:50 PM) or by appointment.

Course Description: Elementary chemical laboratory practice demonstrating the applications
of chemical theory. This laboratory includes experiments on density, changes of state, physical and
chemical properties, percent composition of hydrates, elementary qualitative analysis, chemical
reactions, and empirical formulas. Not recommended for students who plan to take CHEM 1025 or
CHEM 1035. Concurrent enrollment or credit in CHEM 1005 is required. (Taken with CHEM 1005,
equivalent to UW CHEM 1000.)

Statement of Prerequisites: must be taken concurrently with (or following) CHEM 1005.

Goal: This lab seeks to: (i) demonstrate practical laboratory techniques and requisite calculations
through the completion of several fundamental chemistry experiments (ii) instill proficiency in
techniques including measurements of mass, length, temperature, and volume, (iii) prepare you for
identification of several unknowns by various methods, and calculation of quantities such as density,
specific heat, etc.

Outcomes: The following Casper College General Education outcomes may apply to this course:
1. Use the scientific method
2. Solve problems using critical thinking and creativity
3. Use quantitative analytical skills to evaluate and process numerical data
Casper College may collect samples of student work demonstrating achievement of the above
outcomes. Any personally identifying information will be removed from student work used for these
assessments.

Course Objectives: Upon successful completion of this course, students will:
1) be aware of basic safety and emergency procedures when performing chemistry experiments.
2) be trained in the proper procedures for performing experiments, and in the proper handling and use
of chemical reagents, glassware, equipment, and balances.
3) understand the concepts of Basic Chemistry that the laboratory experiments are meant to illustrate
and reinforce.
Methodology: Lab experiments will be performed, typically preceded by a discussion of salient points of the experiment for the day, as well as safety information for working with the particular substances involved in that laboratory experiment. Moodle will also be used to deliver announcements and other content. Moodle Mail is an official means of communication for this class. Changes are made each semester as a result of student feedback, so please complete your course evaluations at the end of the course. Your feedback is valued. The instructor uses course evaluations in determining course methodology.

Evaluation Criteria:
- Ten REPORTS (90 pts per report). A complete Lab Report consists of two parts:
  - Exercises. These may include questions to be answered, calculations, graphs, chemical equations to be balanced or completed, etc. The exercises are due with your report, unless otherwise required by your instructor.
  - Results and Discussion. These may include qualitative and quantitative data, calculations, chemical equations, etc. The reports are to be completed in class, and submitted at the end of lab (i.e. on the same day), unless otherwise required by your instructor.

  These pages will be collected, graded and returned during the next lab period. Missed experiments can only be made up on the discretion of your instructor. The lowest scoring Report will be dropped, so only 9 will be counted toward your score.
- A MIDTERM EXAM (100 pts) covering the first four experiments, and a FINAL EXAM (100 pts) covering the last six experiments. These will be part practical (skill based) and part theoretical (write). Missed exams can only be made up on the discretion of your instructor.
- There is no EXTRA CREDIT offered in this course for any reason.

Class Policies/Last Date to Change to Audit Status or to Withdraw with a W Grade:
- Participation is not optional. Absolutely no ‘dry labs’ will be accepted in this course.
- By registering for, and staying in, this class, you agree to (i) abide by the policies, and (ii) fulfil all the requirements, described in this syllabus. Your instructor reserves the right to make revisions and modifications to this syllabus as needed, subject to sufficient notice to the class of such changes. You are responsible for all announcements (verbal or written), tests, as well as changes in the schedule, whether or not you are in class. Absence neither excuses you from responsibility, nor entitles you to special opportunities or extra notification.
- Your instructor will give you complete information on safety equipment (e.g. safety glasses required, but provided. Lab coat recommended), safety procedures (safe handling of glass, flame, chemicals, etc.), and waste disposal. You are required to obey all instructions issued by your instructor- for your own safety and comfort. You are required to dispose of waste chemicals in the manner prescribed by your instructor. Unless you are told it is safe to dispose of chemicals in the wastebaskets or down the drain, please do not do so.
- Do not miss any labs! Due to the weight of lab performance (80%), each unexcused missed lab can typically drop your grade by one level (i.e., A to B, B to C, etc.)
Your instructor reserves the right to initiate a faculty initiated withdraw (FIW) after two continuous weeks of absence (two meetings), and a retention alert (RA) at his discretion.

Come to class on time. Coming late can be disruptive, and is disrespectful to your classmates and instructor. Your instructor reserves the right to deny attendance sign-up to latecomers.

Your instructor has office hours, an email address, and a phone- please make use of them. Your tests will be returned and discussed, typically within two meetings after the test. You may discuss your test results and grade with your instructor during office hours.

Please, turn the ringer OFF on your cell phone/pager when you are in class and NO texting while working in lab. This is a courtesy to your classmates and instructor and is for your safety and the safety of those around you. Possible exemptions include: you are a firefighter, EMT, the parent of a child for whom you must be available, or waiting for an emergency call. If so, keep your phones on vibrate and step outside the classroom to take the call. You must inform your instructor on a per-meeting basis about your potential incoming call. Text Messaging during class is extremely rude, and will not be allowed at any time. Your instructor reserves the right to take appropriate action if this policy is flagrantly violated.

The last day for withdrawal from the course (assigning a grade of W) is 14th Apr., 2016.

Student Rights and Responsibilities: Please refer to the Casper College Student Conduct and Judicial Code for information concerning your rights and responsibilities as a Casper College Student.

Chain of Command: If you have any problems with this class, you should first contact the instructor to attempt to solve the problem. If you are not satisfied with the solution offered by the instructor, you should then take the matter through the appropriate chain of command starting with the Department Head (Dr. Eric Mechalke), the interim Dean of the School of Science (Dr. Grant Wilson), and lastly the Interim Vice President for Academic Affairs (Dr. Shawn Powell).

Academic Dishonesty: (Cheating & Plagiarism) Casper College demands intellectual honesty. Proven plagiarism or any form of dishonesty associated with the academic process can result in the offender failing the course in which the offense was committed or expulsion from school. See the Casper College Student Code of Conduct for more information on this topic.

Official Means of Communication: Casper College faculty and staff will employ the student's assigned Casper College email account as a primary method of communication. Moodle Mail will be used regularly and is also considered an official means of communication. Students are responsible for checking their accounts regularly. This is also where you will find course evaluation links during course evaluation periods.

ADA Accommodations Policy: If you need academic accommodations because of a disability, please inform me as soon as possible. See me privately after class, or during my office hours. To request academic accommodations, students must first consult with the college’s Disability Services Counselor located in the Gateway Building, Room 344, (307) 268-2557, bheuer@caspercollege.edu. The Disability Services Counselor is responsible for reviewing documentation provided by students requesting accommodations, determining eligibility for accommodations, and helping students request and use appropriate accommodations.

I recognize the complexities of being a member of the military community and also a student. If you are a member of the military community, please inform me if you are in need of special accommodations. Drill schedules, calls to active duty, complications with GI Bill disbursement, and other unforeseen military and veteran related developments can complicate your academic life. If you make me aware of a complication, I will do everything I can to assist you or put you in contact with college staff who are trained to assist you. Thank you for your service.

*a* Lab 11 is an Optional Experiment (to be performed outside of Lab class and submitted no later than Friday May 6th, 2016 at 5 PM to PS 311 - Dr. Mehn’s Office). It will be used to replace the lowest scoring of 9 experiments (after dropping the lowest of 10 performed).

As the instructor, I reserve the right to alter the contents of this syllabus. All revisions will be delivered either verbally in class or in writing (via either your Casper College or Moodle Mail email account).
