

The Utility Locator Certification Course

Casper College is pleased to announce the start of a utility locator course and certification program

The utility locator certification course was developed at the request of One-Call of Wyoming. One-Call of Wyoming helped to fund Casper College to develop a utility locator certification course to train and certify utility locators in Wyoming.

The utility locator certification course is designed to train and certify utility locators on the basic methods for locating and verifying underground utility lines. There are three parts to the course:

- lecture
- lab
- certification.

The utility locator certification course is offered either in the classroom or as a hybrid online class. Students who successfully complete the course will receive a certificate of locating competency from our program partner Staking University, a nationally recognized underground utility locator certification training center.

The classroom course is a five-day course, four days for lecture and labs, and one day for certification testing. The lecture portion consists of theory and practical field demonstrations. The lab portion consist of students using locating equipment to locate utility lines on the Casper College campus. The fifth day of the course will be for certification testing. Each class will be limited to 10 students to allow for quality instructor/student interaction. The classroom course will be offered in both a weeklong format as well as a three-day and then a two-day format a week apart.

2009 Spring Classroom Course Dates:

- Jan. 5-9 • Jan. 22-24 and Jan.29-30 • Feb. 12-14 and Feb. 19-20
- Mar. 19-21 and Mar. 26-27 • Apr. 23-25 and Apr. 30-May 1

The hybrid online course will consist of an online theory section that the student will have four to five weeks to complete, and a two-day lab section in Casper within a week or two of completion of the online section. Students in the online section must pass a final exam to be admitted to the lab section. These hybrid online classes will begin January 12, 2009.

2009 spring hybrid course dates, with four to choose from:

- Jan. 12-Feb.13 with a lab Feb. 18-19 • Feb. 9-Mar. 20 with a lab Mar. 25-26
- Mar. 16- Apr. 24 with a lab Apr. 30- May 1 • Apr. 27-May 29 with a lab June 4-5

In-state tuition for either class is \$146
