Job Title: Lab Technician
Company: Aspen Mountain Medical Center
Location: Rock Springs, WY
Company Web Site: http://aspenmountainmc.com/
Hours (Full-time, Part-time, Seasonal): Part-time
Application Commence Date: Feb 22, 2019

Company Description:
Our founders have spent decades caring for patients in Southwest Wyoming. In that time, they came to believe strongly in the importance of high-quality, affordable healthcare that is accessible and keeps patients near to their families and homes.

So they came together to deliver precisely that.

In a hard-working community that understands the balance of quality and value, Aspen Mountain Medical Center focuses on personalized care and managing costs, so the financial burden of healthcare is not passed on to our patients. And because we’ve made our home here in Rock Springs, patients will spend less time traveling for healthcare and save even more.

Job Summary and Responsibilities:
The laboratory technician is responsible for performing a variety of medical laboratory tests and analysis to obtain data for diagnosis and treatment of diseases. Works independently in performing standard laboratory tests and microscopic examinations.

Occupational Exposure
Category III exposure to bloodborne pathogens and may encounter chemical hazards.

Responsibilities
•Draws blood, stores test sample for necessary procedure and reports out to ordering physician.
•Prepare samples for analysis.
•Monitor procedures and tests in the lab, utilizing laboratory equipment to look for dangerous microorganisms in samples.
•Analyze the chemical content of the samples, matching blood that is to be used in transfusions. Screens and processes incoming patients.
•Cleans and maintains laboratory.

Qualifications:
Qualifications
•Degree from accredited college and completion of an accredited Medical Technology Program.
•Must be currently registered or eligible for registration as a Medical Technologist of Clinical Laboratory Scientist.
•Two years of pervious phlebotomy and skin puncture experience on patients ranging in age from neonate to geriatric and analytical specimen processing experience in a hospital clinical laboratory.
•Experience working in a chemical laboratory or some familiarity with analytical chemistry is a plus, but not mandatory.
•Flexibility in work arrangements, you may be asked to perform the same task for an extended period of time or to perform different asks on the same day.
•Ability to work with other people at the laboratory bench.
•Familiarity with Microsoft office software.
