Casper College School of Health Science
Athletic Training Education
Admission, Progression, and Core Performance Standards

1. Students may take classes at Casper College as non-degree seeking students, but the faculty recommend that those interested in Health Science programs apply as degree seeking students. This allows the student to take full advantage of formal academic advising.
2. To apply as a degree-seeking student, the applicant must:
 - a. Submit a completed Casper College application for admission to Enrollment Services. Available online: www.caspercollege.edu A-Z index
 - b. Submit applicable transcripts, immunization records and test scores, see the online catalog for specific eligibility requirements.
3. When the above documents are received, and the applicant is admitted, Enrollment Services Office will invite the applicant to advising and registration.
4. For admission and progression in a Casper College Health Science Program, a qualified individual is one who, with or without reasonable accommodation or modification, meets the essential eligibility requirements for participation in the program. All Health Science programs have a competitive selection process, application deadlines and materials, and pre-requisite course work. Please review the department's online information at www.caspercollege.edu.
5. The Health Science fields are practice disciplines with cognitive, sensory, affective, and psychomotor performance requirement. Based on these requirements, a list of "Core Performance Standards" has been developed. These standards are part of program courses, and some of the standards are more prevalent than others. These standards will be used to assist faculty, the Program Director, and the School of Health Science Dean in determining whether a student meets the essential eligibility requirements for admission and progression in the program. These standards should also be used to assist students in determining whether accommodations or modifications are necessary for the student to meet program requirements. Students who identify potential difficulties with meeting the "Core Performance Standards" must communicate their concerns to the Accommodative Services Counselor as well as the Program Director. Determination is made on an individual basis as to whether a student meets the essential eligibility requirements or whether or not the necessary accommodations or modifications can be made reasonably for participation in the Health Science program.
6. All admitted Health Sciences students are expected to participate in simulation activities and consent to video recording to optimize instruction and learning.
7. Readmission into a Casper College Health Science Program or transfer between Casper College Health Science programs is at the discretion of the faculty and dean. The faculty and dean will base readmission or transfer decisions on the adopted general Health Science "Core Performance Standards" and specific department criteria.

Casper College School of Health Science
Athletic Training Education

Health Science Core Performance Standards

Table 1

ISSUE	STANDARD
Critical thinking	Critical thinking ability to exercise non-clinical and clinical judgment in a timely manner
Interpersonal	Interpersonal abilities sufficient to interact professionally and therapeutically with peers, faculty, staff, administrators, patients/clients, families and groups from a variety of social, emotional, cultural, and intellectual backgrounds
Communication	Communication skills sufficient for interaction with peers, faculty, staff, administrators, patients/clients, families, and groups in verbal, nonverbal, and written form
Mobility	Physical abilities sufficient to move from room to room, safely perform treatments/procedures and assist patients/clients; lift and transfer patients/clients; manipulate equipment; walk and/or stand for extended periods of time
Motor skills	Gross and fine motor skills sufficient to provide safe and effective patient/client care
Hearing	Auditory ability sufficient to monitor and safely assess health needs
Visual	Visual ability with or without corrective lenses sufficient for observation and assessment necessary in safe patient/client care
Tactile	Tactile ability sufficient for physical assessment of patient/client
Professionalism	The ability to understand and demonstrate sufficient respect for others in non-verbal, verbal, and written communication in the classroom, laboratory, clinical settings, in the Casper College community, and in related public settings. The ability to demonstrate sufficient understanding of the cumulative effect that behavior, appearance, and communication has on the health science professional image.

Digital Learning Academic Integrity Statement

Casper College demands intellectual honesty in all courses. Only admitted and registered Casper College Students who have been assigned logins and passwords are allowed access to online and hybrid courses. These secure logins verify the identity of the student. Proven plagiarism or any form of academic dishonesty associated with the academic process may result in course failure, dismissal from a program, or expulsion from Casper College, or other consequences. See the Casper College Student Code of Conduct for more information on this topic.

Health Science General Policy Statements and Procedures

Clinical Accessibility Policy Statement

Casper College Health Science programs utilize a variety of health care agencies in the community for clinical experience for the students. If you have been employed in one or more of the agencies and are not eligible for rehire as an employee, the agency may not permit you to participate in the essential clinical component of the program.

Please contact the Human Resources department of the affected agency and request documentation from HR that states the agency's position on your participation in the clinical component of the program. If you receive a negative response from the agency, you are **automatically ineligible to apply**. A response indicating you **will be permitted** to attend clinical in the agency will be given to the program director prior to the selection process for admission to the program. If you are unable to fulfill clinical requirements due to a previous employment issue or another issue(s) and have not complied with the above, you could be denied entry in a Health Science program or be dismissed from program. Some programs do not have clinical assignments until the second, third, or fourth semester; students who are denied clinical accessibility at any time prior to or during a program will be dismissed.

Student Driver's License and Automobile Liability Policy Statement

Health Science students are responsible for transportation to activities associated with their program of study. This typically involves the utilization of a reliable, personal vehicle. All admitted Health Science students must provide copies of a valid driver's license and proof of auto insurance card for their personal vehicles. The minimum auto insurance requirements for Wyoming, or the state in which the vehicle is registered must be met. Students must maintain both for the duration of their health science program, and may be asked to present proof at any time during their program of study. To remain in compliance with this policy, students must also notify the program director or faculty should their driving or insurance status change at any time during their participation in a Health Science program. Health Science students, parents, guardians, heirs and estate release Casper College, and any agent thereof, of any and all legal liability which may accrue and understand that Casper College's insurance program will not cover any loss damage or claims incurred as a result of driving their personal vehicles for requirements and activities associated with their program. Health Science students understand and agree that they are wholly responsible for any other person they invited or accepted as a passenger and release Casper College from any and all responsibility and liability for passengers.

Casper College School of Health Science
Athletic Training Education

Health Science students who are unable to present a valid driver's license and proof of auto insurance card must sign an additional waiver provided upon request.

Health Insurance Policy Statement

Students enrolled in any of the health science programs are required to present proof of health insurance and to maintain personal health insurance for the duration of their program. Students may be required to present proof of health insurance at any time during their program of study.

Social Media Policy Statement

Prohibited Recording Device Use, Social Networking Participation, and Public Disclosures of Care

To ensure compliance with both Federal and State patient confidentiality laws, while also maintaining a professional working relationship with our clinical and/or field sites, students are not allowed to utilize photographic, video, audio, or other recording devices (including cell phones) during the course of their instruction or participation in the program unless specifically permitted by instructional staff and affected parties, or as allowed by law. The use of such recording devices is strictly prohibited during all clinical and/or field experiences.

Students are strictly prohibited from including or posting information pertaining to clinical and/or field experiences on social networking websites (such as Facebook, MySpace, or Twitter) or any other type of internet, computer, or technology-based social networking site, electronic bulletin board, blog, wiki, listserv, or equivalent media outlet.

Public scrutiny, criticism, or disclosure of patient care delivered by clinical and/or field site staff/personnel is strictly prohibited, unless such disclosure is required or protected by law. Such disclosures include those made via social networking sites, as well as other traditional means of communication. If a student witnesses care issues at a specific site, such concerns should be directed to their instructor.

A breach of any of these provisions could lead to an immediate dismissal from the program.

Background Check and Drug Testing Policy Statement

- A. Students enrolled in any of Casper College's health science programs will participate in clinical experiences in a variety of agencies. Prior to participating in the clinical experiences, students will be subject to that agency's requirements for a background check, immunizations, and drug testing and drug abuse prevention policies. Students are then subject to the random drug testing policy of that agency.
- B. Following graduation, several of the state and/or national licensing or certification (registry) boards, may refuse to allow a graduate to sit for the required exam or issue a license or certification to a person who has a prior felony conviction or proven history of drug or alcohol abuse. Applicants to whom this applies should consult the program director for further information.

Casper College School of Health Science
Athletic Training Education

Chemically Impaired Health Science Student Policy Statement

- A. The faculty of the School of Health Science has a professional and ethical responsibility to the student and clients. The faculty requires that health science students provide safe, effective, and supportive client care. To fulfill this purpose, students must be free of chemical impairment during participation in any part of the health science programs including classroom, laboratory, and clinical settings.
- B. The faculty defines the chemically impaired student as a person who, while in the academic or clinical setting, is under the influence of, or has abused, either separately or in combination: alcohol, over-the-counter medication, illegal drugs, prescribed medications, inhalants, or synthetic designer drugs. Abuse of the substances includes episodic misuse or chronic use that has produced psychological and/or physical symptomatology. This health problem must be proactively addressed when identified within the health science student population. Faculty will follow the college's "Drug Free Campus Policy" as outlined in the Casper College Student Handbook and Annual Campus Security Report. In addition, the health science faculty will intervene with the chemically impaired student as outlined in the established School of Health Science procedure.
- C. The appropriate use of legally prescribed drugs and non-prescription medications is NOT prohibited. It is the student's responsibility to refrain from attending clinical while under the influence of legal prescription or non-prescription medication that adversely affects mental function, motor skills or judgment.
- D. A legally prescribed drug means the individual has a prescription or other written approval from a medical professional for the use of that drug in the course of medical treatment. A confirmed positive drug screen resulting from a prescription medication must be verified. Students shall inquire of the prescribing professional whether the drug prescribed has any side effects which may impair the student's ability to safely perform clinical responsibilities. The misuse of legal drugs while performing clinical responsibilities is prohibited. Students found misusing prescriptions will be referred for a mandatory evaluation and treatment.
- E. The health science faculty is cognizant of the various state board recommendations on chemically impaired students who apply for licensure and will communicate this information to students. Faculty recommends that on application for licensure the student offers full disclosure of chemical dependence and extent of the treatment received.

Casper College School of Health Science
Athletic Training Education

Procedure for Alleged Chemically Impaired Health Science Student

1. Health science faculty or clinical supervisor is to gather and document data on behaviors. If the student demonstrates impaired behaviors in the classroom, campus lab or clinical site the faculty or clinical supervisor will:
 - A. Notify the director of program of the pending situation.
 - B. Remove the student to a private area and provide the opportunity for the student to explain the observed behavior(s)
 - C. If on campus, notify security (2688) and request a breathalyzer or breath strip evaluation.
 - D. If client care is involved, relieve the student of the client assignment.
 - E. Students suspected of drug or alcohol use will NOT be permitted to return to clinical while awaiting test results, and absence time will accrue. In the event that a student is suspected of illegal drug or alcohol abuse through second hand knowledge, the suspected student may voluntarily submit to a drug and/or alcohol test to further clear any suspicion.
 - F. A student's refusal to submit to drug/alcohol testing will be considered failure to comply with a reasonable request. At that time, the student's actions would be considered noncompliant with the program policies and would be grounds for disciplinary action, and may result in termination from the program.
 - G. The student and director of the program will be notified of results.
 - H. Collaborate with the clinical site regarding substance-abuse policies pertaining to student in the clinical setting, if applicable.
2. An information meeting will be scheduled prior to the results of the drug/alcohol testing, or prior to disciplinary action.
3. Information Meeting

Involved health science faculty, the clinical supervisor (s), the director of the program, and the student review the documentation of the alleged substance abuse and discuss the procedures that will be followed for procedure implementation.

 - A. Make student aware of the faculty's/ supervisor's allegations.
 - B. Review the procedure.
 - C. Present documentation concerning student's behaviors and provides the student with opportunity to discuss the observations.
 - D. Documentation of the student's behaviors, faculty's recommendations for follow-up, the student's written response to the allegations, and the date and time for the intervention meeting.
 - E. Documentation is dated and signed by the faculty/ supervisor (s), director of the program and the student.
 - F. Original is placed in student file and copy is given to student.
4. Intervention Meeting

Casper College School of Health Science
Athletic Training Education

- A. Involves faculty/ supervisor (s) who identified the problem, appropriate faculty, the student, a student support person, if desired, and the director of program. The purpose of the meeting is to:
 - i. Review the student's behavior and classroom/clinical performance.
 - ii. Discuss the policy for impaired health sciences students and its implementation.
 - iii. Discuss the academic consequences related to the policy violation.
 - iv. Secure the student's agreement to seek a comprehensive substance abuse evaluation.
 - B. Documentation is completed that articulates the problem behaviors, any academic consequences, the student's agreement to seek a professional evaluation for a potential substance abuse problem, and the student's understanding that failure to abide by the recommended treatment plan will result in dismissal from the program.
 - C. The director of program provides the student with contact information for the Wyoming Professional Assistance Program (WPAP) so that a professional evaluation can be done.
 - D. The student may not attend program lecture classes or clinical until a substance abuse evaluation is obtained.
 - E. If the student refuses to obtain an evaluation, s/he is dismissed from the program.
 - F. If the student tests positive, the student is dismissed from the program secondary to the student being unable to continue at the clinical site.
 - G. The student, faculty and the program director sign documentation of the intervention meeting and it is then placed in the student file with a copy provided to the student.
4. A "Student Grievance Procedure" is available in the Casper College Student Handbook and Datebook if the student believes the allegation(s) regarding chemical impairment and the outcome of the intervention meeting are not justified.

Casper College School of Health Science
Athletic Training Education

Athletic Training Clinical Policies and Expectations

When enrolled in the Casper College Athletic Training Education Program (ATEP), you will be assigned to various clinical sites for which you must have accessibility. The clinical rotations and instructors include:

Location	Clinical Instructor(s)	Phone number:
Casper College	Dan Dalen; Mike Moline	268-2518; 268-2259
Casper Orthopedics	Nancy Robertson	337-3204

Expectations

In addition to the following ATEP specific policies, students are required to follow the guidelines as per the Casper College Student Handbook and the School of Health Science Admission, Performance Standards, Policies, Procedures, Forms document.

Dress

You are expected to dress appropriately at your clinical site. This includes wearing a Casper College shirt whenever you are at your clinical site. A Casper College t-shirt with the Athletic Training logo will be provided to first year students. Any other Casper College attire will be purchased at your expense. Please consult your clinical instructors for their regulations on attire, including any differences among treatments, practices, and games. Failure to abide by your clinical coordinator's dress code will result in a meeting with your clinical instructor and athletic training faculty to warn you about potential consequences. Continued offenses following this meeting may result in removal from your clinical site, which may cause you to fail the course. You may or may not be allowed to repeat the course one year later at the discretion of faculty.

Creating a Schedule

It is your responsibility to maintain an accurate schedule for your clinical rotations. These schedules must be created prior to the start of each rotation. The schedule must outline the dates and times when you will be at your clinical site for the entire rotation. This schedule must be created and signed by the student and clinical instructor prior to the start of each clinical rotation.

Casper College School of Health Science
Athletic Training Education

A copy of this schedule will be held by the student, clinical instructor, and the Casper College Athletic Training faculty. Failure to turn in a signed schedule to all personnel prior to the start of the rotation will result in your clinical hours not qualifying toward the required total until a schedule is turned in.

Absence from Clinical Site

In the unlikely event that you will need to miss a scheduled clinical visit, you are required to communicate that absence with your clinical instructor and the athletic training faculty. This communication must occur **before** the absence and permission for an absence will be at the discretion of the clinical instructor and athletic training faculty. Any absence without communication or recurring requests for absences will result in a meeting with your clinical instructor and athletic training faculty to warn you about potential consequences. Continued offenses following this meeting may result in removal from your clinical site, which may cause you to fail the course. You may or may not be allowed to repeat the course one year later at the discretion of faculty. This includes **all** dates that you signed up for, including breaks and holidays. Extreme circumstances will be considered on a case by case basis.

Tardiness

You are expected to be at your clinical site **and ready to treat athletes** by your scheduled time. On time is *late* in athletic training. Tardiness will result in a meeting with your clinical instructor and athletic training faculty to warn you about potential consequences. Continued offenses following this meeting may result in removal from your clinical site, which may cause you to fail the course. You may or may not be allowed to repeat the course one year later at the discretion of faculty.

Confidentiality

Communication is a key skill in athletic training and communicating athlete conditions is important. However, you need to know who you are allowed to communicate with, and who you may not communicate with. In most cases, it is acceptable to communicate conditions with: Your clinical instructor, Team physicians, Fellow athletic training students *who are also directly involved in the health care of the athlete*. It is **NOT** ok to communicate conditions with: Coaches, Media, Other athletes, Fellow athletic training students who are not directly involved in the health care of the athlete. In some cases, you may be asked to or want to discuss an interesting case while in class. This is OK, *as long as you do not give away the identity of the athlete you are discussing*. This policy also includes any and all social medias, use of any and all recording devises and any public disclosure. **Any breach of confidentiality will result in immediate removal from the athletic training program.**

Casper College School of Health Science
Athletic Training Education

Personal and Social Conduct

It is a privilege to be a student in the Casper College ATEP. Students must conduct themselves in a professional manner at all times. Any misconduct may result in an indefinite probation or dismissal determined by ATEP faculty and as per the School of Health Science Handbook. While at clinical sites, students are to conduct themselves by the rules of the assigned clinical instructor. If traveling with an athletic team without an athletic trainer, students are to conduct themselves by the rules of the coach. Failure to comply with the conduct policy will result in a meeting with your clinical instructor and athletic training faculty to warn you about potential consequences. Continued offenses following this meeting may result in removal from your clinical site, which may cause you to fail the course. You may or may not be allowed to repeat the course one year later at the discretion of faculty.

Insubordination

Insubordination will not be tolerated. Any insubordination will result in a meeting with your clinical instructor and athletic training faculty to warn you about potential consequences. Continued offenses following this meeting may result in removal from your clinical site, which may cause you to fail the course. You may or may not be allowed to repeat the course one year later at the discretion of faculty.
