Crafting Future Ready Strategies Together!

Training Focus: *Developing and implementing skills for building, district, and higher education leadership for direct implementation of AI policies, ethical considerations, data privacy, and legal compliance.*

Why Recommended:

- Establishes a framework for responsible AI use.
- Ensures compliance with regulations and ethical standards.
- Guides data security and privacy.
- Helps mitigate risks associated with AI implementation.

Outcomes:

- Workshop model resulting in utilization of AI tools and resources to support policy development for your team
- Empower educational leaders with AI tools and skills to support work in educational leadership roles
- Considerations for establishing an AI team within your school districts or colleges.

Target Audience:

- School Board members
- Superintendents
- Principals
- Special Education Directors
- IT Directors
- College Board of Trustees
- College Presidents and Vice Presidents
- Deans
- Faculty Senate Members
- Additional school and leadership personnel

About the Presenter

Matt Mervis directs AI strategy at EdAdvance (the Educational Service Agency in Litchfield, CT) and is co-host of the AI in Education Podcast ChatEDU. In addition, Matt leads the Skills21 team at EdAdvance and he's focused on enabling project-based learning and AI. Matt has deep experience in education having served in a range of roles including teacher, professional development specialist, district technology director and product developer. Matt presents frequently on AI and the future of education for regional and national audiences. Known for his engaging and accessible style, Matt blends expertise with humor to make AI both practical and thought-provoking for educators, leaving audiences inspired and ready to take action.
