Academic Fieldwork Coordinator

Cassady Hoff, MSOT, OTR/L

(307) 268- 2867

Program Director

Introduction

This manual is designed to provide the occupational therapy assistant (OTA) students and fieldwork educators (FWE) with easily accessible information about the fieldwork program within the Casper College Occupational Therapy Assistant Program. Fieldwork is intended to complement academic preparation by offering additional opportunities for growth, learning to apply knowledge, developing and testing clinical skills, and validating and consolidating those functions that comprise professional competence. Fieldwork experiences should be developed to offer opportunities for development of the necessary skills and abilities in the performance of the occupational therapy assistant.

The fieldwork program is possible through the cooperative efforts of the Occupational Therapy Assistant Program, healthcare facilities, fieldwork educators, and the participating OTA students. Information relevant to each party regarding policies, procedures, and general guidelines pertaining to all levels of fieldwork education can be found within this manual.

Fieldwork educators are encouraged to consider their current workload before accepting occupational therapy assistant students for fieldwork experience. The faculty at Casper College asks that no fieldwork educator compromise their workload, consumer safety, or the students' educational process due to over commitment. To maintain the quality and effectiveness of student supervision, the fieldwork educator will not exceed supervising more than a 1:2 fieldwork educator to student ratio at any given time (1 Fieldwork Educator: 2 Students). Per the Casper College Fieldwork Program Supervision Policy, this ratio enables proper supervision, provides protection to consumers, provides opportunities for appropriate role modeling of occupational therapy practice, and frequent assessment of student progress in achieving the stated fieldwork objectives (ACOTE C.1.7).

MISSION

In alignment with Casper College's mission to provide learning opportunities to enrich the lives of our students and community, the Occupational Therapy Assistant program provides an environment that encourages students of diverse learning styles, ages, and backgrounds an opportunity to gain mastery over their education at the associate level through the progression of academic and experiential learning opportunities. Each semester, students gain greater confidence, cultivate critical thinking, and demonstrate enriched professionalism essential to work as a generalist occupational therapy assistant. Through the learning opportunities, students will view themselves and their clients as holistic, occupational beings and appreciate the importance of occupation-based activities to improve the lives of those they encounter. By the end of the program students are invested in the importance of lifelong learning and stewardship of the occupational therapy profession, populations served, and their communities.

PHILOSOPHY

It is the philosophy of the Occupational Therapy Assistant Program that humans are self-directed, adaptive, and holistic occupational beings. Students enter the program with unique and diverse life experiences, seeking additional understanding of themselves and others, and the world in which they live. Occupational engagement is central and critical to the promotion of health and wellness for self, populations and communities. The promotion and sustainability of the profession relies on the stewardship of occupational therapy practitioners both current and upcoming. The definition of stewardship to the Occupational Therapy Assistant Program is the act of advocacy for self and others, ethical practice, team building and collaboration, lifelong dedication, and managing the care of others in which we are entrusted. Stewardship is gained following Bloom's Taxonomy, Schkade & Shultz's Occupational Adaptation Model, and Erikson's Stages of Psychosocial Development.

Bloom's Taxonomy progresses students' critical thinking skills from basic knowledge to generalist practitioners, emphasizing psychosocial theory and the importance of occupation-based practice. In the view of the Occupational Therapy Assistant Program's curriculum, learning is the active development of knowledge through academic and experiential learning opportunities, which occurs through engagement, problem-solving, and critical thinking. Progression through the program begins with cultivating knowledge and comprehension, advancing towards application and analysis, followed by synthesis and evaluation, and ending with in vivo fieldwork experience. At the conclusion of the program, students will have mastered the ability to make informed decisions with sound judgment necessary for generalist clinical practice.

The Occupational Therapy Assistant Program utilizes Occupational Adaptation to guide and develop students into their new professional role as an occupational therapy assistant. Upon entry into the program, students encounter new academic, occupational, and environmental challenges. The curriculum and cultural environment of the program encourages active engagement, mastery of academic skills, cultivation of professionalism and self-advancement. It is through student engagement with meaningful learning opportunities that students develop adaptation and mastery over these challenges. The academic environment is designed to challenge and support the diverse learning styles, ages and backgrounds of students.

Erikson's Psychosocial Developmental Theory is used to support and progress students from trust to ego identity. The OTA Program understands that students come from diverse life experiences with unique learning styles, and of different ages and backgrounds. However, most

students will still follow the psychosocial stages throughout their academic career as this is a new and challenging experience. As stated in the Occupational Adaptation model above and in support of Erikson's psychosocial stages of development, the program creates a supportive and trusting environment by understanding that students learn differently, as well as handling challenging situations in diverse ways. The OTA Program understands this and helps students to develop their autonomy through the progression of the program. This transformation of personal and professional growth is guided by following and mastering Erikson's Psychosocial Stages of Development. Graduates will demonstrate professional identity as an occupational therapy assistant and a sense of integrity regarding their role and stewardship in the profession and communities served.

OTA PROGRAM OUTCOMES

The Occupational Therapy Assistant Program will graduate students who:

1. demonstrate adaptation and mastery over academic challenges as demonstrated by successfully completing their education at the associate level to earn their Associate of Science degree in Occupational Therapy Assistant,
2. demonstrate mastery of academic and experiential learning and apply this knowledge to successfully pass the National Board of Certification of Occupational Therapy exam,
3. demonstrate professionalism and lifelong learning by obtaining and maintaining licensure in the state of Wyoming and/or their chosen state of practice,
4. demonstrate integrity and professionalism while following the American Occupational Therapy Association's Occupational Therapy Code of Ethics, which is essential to work as a generalist occupational therapy assistant,
5. appreciate and implement evidence-based practice through client centered, occupation-based activities when serving the needs of a person, population and community,
6. are self-directed, adaptive, and holistic generalist practitioners,
7. are lifelong learners and demonstrate stewardship to the occupational therapy profession, populations served, and their communities.

NON-DISCRIMINATION POLICY

Casper College is an equal opportunity institution and as such, does not discriminate on the basis of race, sex, color, national origin, religion, age, veteran status, political affiliation, disability, sexual orientation, gender identity, or any other characteristic protected under applicable federal, state, or local law in admission or access to or treatment or employment in its educational programs or activities.

DISTANCE EDUCATION

The OTA Program is not a distance education program. Two prerequisite courses are offered completely online, face to face, or hybrid (a combination of the two), including OTH 2000 Introduction to Occupational Therapy and COTA 2300 Fieldwork Integration I. This gives students flexibility to explore the OTA Program. Once a student is admitted into the OTA Program, there are several hybrid courses and two distance education courses which allow students to primarily be on campus only three days a week. Upon academic completion, students will complete COTA 2500 Fieldwork A and COTA 2550 Fieldwork B, using Moodle, the Learning Management System, in conjunction with the fieldwork assignments to facilitate communication between the academic fieldwork coordinator (AFWC) and OTA students. All distance learning courses are password and email protected through Moodle. The OTA Program requires all students to complete proctored testing in either the Casper College Testing Center

or through the use of Respondus Lockdown Browser+ Webcam when not testing in the classroom. Both of these testing options require proof of student identification in order to test. Casper College students are not charged for obtaining a student identification card at the time of registration or enrollment. If a student encounters a fee for identification validation at any point, they are to contact the Academic Fieldwork Coordinator and/or Program Director of the OTA program. The faculty will encourage Respondus lockdown browser with a camera, or communicate with the testing center to waive fees.

The faculty utilizes Moodle to house learning materials for the OTA students and enhance classroom instruction. Technical support and training are available to any student using Moodle.

LEARNING MANAGEMENT SYSTEM: The OTA Program uses Moodle, the Learning Management System, to house learning materials for students, enhance classroom instruction, and for testing. All distance learning courses are password and email protected through Moodle. The OTA Program requires all students to complete proctored testing in either the Casper College Testing Center or through the use of Respondus Lockdown Browser + Webcam when not testing in the classroom. Technical support and training are available to any student using Moodle through the Casper College Digital Learning Center. Students are encouraged to bring their laptop with them to class to access and participate in all course related assignments/ learning activities.

STATE AUTHORIZATION RECIPROCITY AGREEMENT (SARA) COMPLIANCE

Casper College is required to comply with any state regulations before educational courses can take place within that state. The program has determined that this curriculum meets the educational requirements for state licensure in Wyoming. The regulations for any state and Casper College's ability to comply with these regulations will determine whether a student may enroll in a course. Courses that are regulated include offering online and/or campus-based courses, as well as fieldwork experiences. Casper College participates in the [National Council of State Authorization Reciprocity Agreement \(NC-SARA\)](#). Once a student has graduated from the Occupational Therapy Assistant Program, the student will be eligible to take the national certification exam through the [National Board for Certification in Occupational Therapy \(NBCOT\)](#). Students earning national certification are eligible to apply for occupational therapy assistant jobs in the United States. Each state has their own licensing requirements, with the Wyoming Board of Occupational Therapy licensing requirements available here: <https://occupationaltherapy.wyo.gov/>.

STUDENT CERTIFICATION AND LICENSURE

Upon successful completion of both academic and fieldwork education, a student is eligible to sit for the National Board for Certification in Occupational Therapy (NBCOT) exam administered by the [National Board for Certification of Occupational Therapy \(NBCOT\)](#). After successful completion of the NBCOT exam, the graduate will be a Certified Occupational Therapy Assistant (COTA). All 50 states within the United States require licensure to practice and state licensure is usually based on the results of the NBCOT certification examination. Check with the State Licensing Board for each state's requirements.

States have similar requirements for obtaining a license, but not identical. It is recommended that students look at the specific state licensure requirements and always refer to the state occupational therapy regulatory agency. Please refer to [AOTA's website](#) for further questions.

To earn a state license, the student will need to:

1. Successfully graduate from Casper College's accredited OTA Program.

2. Apply for and pass the OTA [NBCOT Certification Exam](#) .
3. Apply for a license within the state of interest and pay a licensure fee.

The Occupational Therapy Assistant Program is accredited by the Accreditation Council for Occupational Therapy Education (ACOTE) of the American Occupational Therapy Association (AOTA), 7501 Wisconsin Avenue, Suite 510E, Bethesda, MD 20814. ACOTE's telephone number c/o AOTA is (301) 652-6611 and the web address is: <https://acoteonline.org>. The program was initially accredited in 1997, reaccredited in 2002, 2012, 2022, and the next reaccreditation is 2032.

NOTE: To ensure that occupational therapy practitioners meet ethical and professional standards prior to entering the profession, all applicants for initial certification are required to provide information and documentation related to any illegal, unethical or incompetent behavior. Persons with a felony history may not be eligible to sit for the national certification examination. When students apply for the certification examination with the National Board for Certification in Occupational Therapy (NBCOT), students will be asked to answer questions related to the topic of felonies. For further information on these limitations, students can contact NBCOT at:

National Board for Certification in Occupational Therapy (NBCOT)
One Bank Street, Suite 300
Gaithersburg, MD 20878
(301) 990- 7979
Email: info@nbcot.org

CURRICULUM DESIGN OVERVIEW

In the view of the Casper College OTA Program, learning is the mastery of knowledge through a supportive and challenging environment and academic and experiential learning, thereby cultivating critical thinking and professionalism. The Casper College OTA Program's curriculum is guided by Bloom's Taxonomy from simple to complex, along with Schkade & Schultz Occupational Adaptation model to provide a challenging and supportive learning environment. The learning environment is unique by providing students with direct access to a OTA Lecture/Lab, Rehabilitation Gym, Apartment and Assistive Technology Lab. The OTA Program faculty also utilize Erik Erickson's Psychosocial Stages of Development to guide and develop each students' transition towards a generalist entry level practitioner. The courses are intentionally sequenced to develop mastery over entry level occupational therapy skills. The faculty teaches through a variety of approaches intended to actively engage individuals and integrate occupational therapy knowledge through active discussions, hands-on learning activities, simulation, role-playing, community engagement, active self-reflection, critical thinking, and evaluation.

The Casper College OTA Program consists of six consecutive semesters in length with a total of 79 credit hours. Fall semester is considered a curricular Level I semester. Students apply to the OTA Program during the first fall semester and upon being accepted into the OTA Program, the students officially start the OTA Program in the first spring semester. The initial spring semester OTA courses are curricular Level I and Level II courses. The curricular levels continue until completion of the OTA Program.

Although the OTA Program is not a distance education program, the OTA Program faculty believe in utilizing the Learning Management System, Moodle, to enhance delivery options for

diversified learning needs. Thus, some courses are available completely online, hybrid, or face to face to meet the occupational adaptation learning needs of students.

Curriculum Design

Level I: The first curriculum level focuses on knowledge and comprehension of introductory principles and adaptation to concepts to set the foundation of the occupational adaptation levels. These classes create academic, experiential, and occupational challenges to facilitate mastery of skills necessary to progress to the next level. The occupational therapy assistant students are enrolled in foundational classes, introduced to the occupational therapy assistant club, become acquainted with Level II occupational therapy assistant students, and are provided with academic supports relevant to their needs. Within this level, students are academically challenged and participate in various experiential learning environments, supported by instructors and other resources available at the college, instilling trust and the ability to adapt within this environment. There are many moving components within this first level to help students develop the trust needed to move on to the next step of autonomy. Autonomy develops half way through the students first level due to how the curriculum is designed. Students learn new methods of study skills, problem solving strategies, and cultivation of professional behaviors in order to support their identity development as an occupational therapy assistant student.

Level I courses include: the occupational readiness courses including: ZOO 2015 Anatomy, ZOO 2025 Physiology, PSY 1000 General Psychology, ENGL 1010 English Composition I, COMM 2010 Public Speaking, OCTH 2000 Introduction to Occupational Therapy, COTA 2300 Fieldwork Integration I, COTA 2020 Human Occupations and Life Roles, PEAC Physical Education, MATH 1000 Problem Solving, POLS 1000 US and Wyoming Government, General Education and General Electives.

Validation of Mastery: Knowledge and comprehension of Level I concepts are validated through a final grade of "C" or higher in all general education and COTA/OCTH requirements, as well as the following specific benchmarks:

- COTA 2020 (Human Occupations): Knowledge of developmental milestones across the lifespan is validated through lab practicals, exams, verbal presentations, and written assignments, all assessed using standardized grading rubrics.
- COTA 2300 (Fieldwork Integration I): Students demonstrate foundational knowledge of the OT/OTA role and various practice settings. Mastery is validated through medical terminology exams, standardized professionalism rubrics, and reflective video observations.
- OCTH 2000 (Introduction to OT): (Added for consistency) Validation of the history, philosophy, and ethics of the profession through written examinations and reflective assignments.

Level II: Courses in curriculum Level II provide application and analysis of knowledge gained in the Level I courses to concepts. These classes are based on academic and experiential challenges to further advance the students' knowledge in themselves, as well as the holistic occupational based needs of future patient populations. The classroom environments at this level challenges and demands mastery of adapting to their new-found personal awareness and understanding of differing views. Competency at this level includes beginning skill development and concept integration. Upon being supported and encouraged throughout the other stages, the transition naturally starts to flow and develop in academic and non- academic environments and

situations. By the end of the semester, students transition into the stage of initiative regarding their occupational needs. Second semester students begin to develop their identity through academic and experiential learning opportunities in order to validate the students' identity and personal strengths, as well as the relationship to occupational therapy. The intimate experiential aspect of the class is hands-on engagement and feedback from peers and others. Students' strengths are emphasized during the application resulting in a natural boost of confidence in themselves and their abilities. The experiential classrooms directly develop the students' strengths and confidence by creating the identity of an occupational therapy assistant and the values of stewardship, for their profession, populations served, and the community. By the end of this semester, students have created an intimate and supportive environment in peers, community members, and faculty.

Level II courses include: KIN 2050 Functional Kinesiology, COTA 2420 Clinical Conditions, COTA 2200 Therapeutic Approaches I, COTA 2150 Group Dynamics, COTA 2310 Fieldwork Integration II, COTA 2320 Fieldwork Integration III, COTA 2350 Clinical Theory and Practice I, COTA 2100 Psychosocial Aspects.

Validation of Mastery: Application and analysis is validated by a final grade of "C" or higher in all coursework and specific performance-based benchmarks:

KIN 2050 (Functional Kinesiology): Validated through standardized lab practicals and exams.

COTA 2420 (Clinical Conditions): Evaluated through evidence-based research papers and diagnostic exams.

COTA 2200 (Therapeutic Approaches I): Validated through formal activity analysis assignments and presentations.

COTA 2310 & 2320 (Fieldwork Integration II & III): Application of skills is measured via documentation assignments and passing scores on the Community Experiences Fieldwork Evaluation Form and the AOTA Level I Fieldwork Competency Evaluation.

COTA 2150 (Group Dynamics): Professional identity and stewardship are quantified via standardized rubrics during the Grief Camp experience, and self-reflection assignments.

COTA 2350 & 2100 (Clinical Theory / Psychosocial Aspects): Mastery is demonstrated through lab practicals, the development of client profiles, and the administration of standardized assessments during simulated clinical encounters.

Level III: Courses in curriculum Level III provide synthesis and evaluation of skills gained in Levels I-II. Emphasis of curriculum is placed on academic and experiential learning to support critical thinking and problem solving for all aspects of occupation-based practice. Within this level, the demands and challenges, both academically and psychosocially are advanced, which further facilitates the cultivation of knowledge and comprehension of skills gained in the previous levels. This emphasizes the importance of active engagement through meaningful learning opportunities in a supportive environment while evaluating and appraising their own performance. Students integrate professionalism of generativity necessary for their future career as an occupational therapy assistant.

Level III courses include: COTA 2210 Therapeutic Approaches II, COTA 2160 Leadership Skills, COTA 2330 Fieldwork Integration IV, COTA 2400 Clinical Theory and Practice II, COTA 2220 Therapeutic Approaches III, COTA 2450 Health Care Systems.

Validation of Mastery: Mastery of Level III concepts is validated by a final grade of "C" or higher and specific performance-based benchmarks:

- COTA 2210 & 2220 (Therapeutic Approaches II & III): Synthesis is validated through mock OT treatment sessions across the lifespan (Pediatric, Mental Health, Physical Disabilities, and Geriatrics). Students must justify intervention choices through verbal presentations and lab practicals.
- COTA 2160 (Leadership Skills): Concepts are validated through a community protocol write-up and the implementation of OT-based groups, including a peer review evaluation to assess leadership and professional behaviors.
- COTA 2330 (Fieldwork Integration IV): Critical thinking is assessed via electronic documentation assignments and successful completion of the AOTA Level I Fieldwork Evaluation.
- COTA 2400 (Clinical Theory and Practice II): Evaluation skills are demonstrated through the administration of standardized assessments, reporting data, and complex clinical simulations.
- COTA 2450 (Health Care Systems): Synthesis is validated through a cumulative written assignment requiring critical problem-solving of healthcare delivery models and a graded peer-teaching presentation.

Level IV: Courses in curriculum Level IV provide opportunities for In Vivo application through mastery of knowledge and skills during the Level II fieldworks. The final stage of ego identity happens the last few weeks of the students' final semester, and is even more pronounced after successful completion and mastery of the students final Level II fieldwork experiences and graduation. By the end of the Occupational Therapy Assistant Program, students will view themselves as self-directed, adaptive, and holistic occupational beings demonstrating stewardship of the occupational therapy profession, populations served, and their communities.

Level IV courses include: COTA 2500 Fieldwork A and COTA 2550 Fieldwork B

Validation of Mastery:

COTA 2500 & 2550 (Fieldwork A & B): Successful completion of two 8-week rotations. Mastery is quantitatively validated via the AOTA Fieldwork Performance Evaluation (FWPE) for the Occupational Therapy Assistant Student. Students must achieve a passing score that reflects entry-level clinical safety and competence.

Professional Identity: Validation is achieved through the successful integration of clinical reasoning, ethical practice, and stewardship as documented in the final FWPE evaluations and verified by clinical educators and program faculty.

OCCUPATIONAL THERAPY ASSISTANT CURRICULUM SEQUENCE

The following sequence is recommended for students wanting to complete the academic program in five semesters. Other sequences are possible depending on student needs. The courses with the prefix COTA must be taken sequentially. The rationale for this sequence ties to the OTA Program's mission and philosophy in the following ways: distance and delivery from beginning of program to end of program.

Year 1: Fall

ZOO 2015/2015L	Human Anatomy & Lab	4
ENGL 1010	English Composition I	3
OCTH 2000	Introduction to OT	2
COTA 2300	Fieldwork Integration I	2
PSYC 1000	General Psychology	3

PEAC HW	Health and Wellness	1
MATH	1000 Level or above Math course	3
	Total Credits	18

Year 1: Spring

ZOO 2025/2025L	Human Physiology & Lab	4
COTA 2020	Human Occupations and Life Roles	2
COTA 2200	Therapeutic Approaches I	2
COTA 2310	Fieldwork Integration II	2
KIN 2050	Functional Kinesiology	3
	Humanities	3
	TOTAL CREDITS	16

Year 1: Summer

COMM 2010	Public Speaking	3
COTA 2420	Clinical Conditions	3
COTA 2150	Group Dynamics	1
	TOTAL CREDITS	7

Year 2: Fall

COTA 2100	Psychosocial Aspects	3
COTA 2160	Leadership Skills	2
COTA 2210	Therapeutic Approaches II	2
COTA 2320	Fieldwork Integration III	2
COTA 2350	Clinical Theory and Practice I	3
	Fine Arts	3
	TOTAL CREDITS	15

Year 2: Spring

COTA 2220	Therapeutic Approaches III	3
COTA 2330	Fieldwork Integration IV	2
COTA 2400	Clinical Theory and Practice II	3
COTA 2450	Health Care Systems	3
POLS 1000	American & Wyoming Government	3
	General Education	3
	TOTAL CREDITS	17

Year 2: Summer

COTA 2500	Fieldwork A	3
COTA 2550	Fieldwork B	3
	TOTAL CREDITS	6
	TOTAL PROGRAM CREDITS	79

COURSE DESCRIPTIONS

OCTH 2000 Introduction to Occupational Therapy (2L,2CR):

This course is designed to introduce students to the occupational therapy profession. As the history, scope of practice, objectives and functions of occupational therapy are addressed, students will affirm their academic decision. Offered distance learning or in class.

COTA 2020 Human Occupations and Life Roles (1L,2LB,2CR):

The foundation of occupational therapy is purposeful activity related to development and life roles. This course provides an in-depth exploration of occupations and life roles throughout the life cycle while exploring occupational therapy theory, analysis and synthesis of occupations as performed in the various life stages. Provides discussion of influences of disability and culture to occupational performance. Prerequisite: permission of OTA Program Director. Offered hybrid.

KIN 2050 Functional Kinesiology (2L,2LB,3CR):

Building from anatomy knowledge, this course provides a study of normal mechanics of human movement and functional limitations related to disabling conditions. Upper and lower extremity function is studied. Range of motion and manual muscle testing of kinesthetic movement are practiced with an emphasis of upper extremity. Neuroanatomy concepts related to occupational therapy are presented. Prerequisite: COTA 2420, ZOO 2040, ZOO 2041.

COTA 2100 Psychosocial Aspects (2L,2LB,3CR):

This course addresses acute and chronic psychosocial dysfunction conditions and occupational therapy's role in providing service. Various developmental concerns and mental health settings are discussed. The OTA's role in interventions is presented including theory, evaluation, treatment planning and intervention. Psychosocial issues in physical dysfunction are also explored. Taken concurrently with COTA 2210 and 2320. Prerequisite: COTA 2200, 2300, 2310, 2420, and PSYC 1000. Offered hybrid.

COTA 2150 Group Dynamics (2LB,1CR):

This course is designed to develop effective interpersonal communication to prepare students for professional/patient interactions in clinical practice and the engagement of therapeutic use of self. An emphasis is placed on the development of basic listening skills, providing meaningful feedback, and group membership skills. This course provides an environment, which promotes sharing of ideas, attitudes and feelings, peer feedback and support of group members. Prerequisite: admission into the OTA Program or permission of the OTA Program Director.

COTA 2160 Leadership Skills (1L,2LB,2CR):

This course promotes effective interpersonal communication for group and professional leadership, evaluation of self and others, and therapeutic use of self-techniques necessary for effective occupational therapy service provision. Group leadership and interactive skills are practiced along with activity analysis, adapting and grading of group activities. Taken concurrently with COTA 2100 and 2210. Prerequisite: COTA 2150, 2200, 2300, 2310, and 2420. Offered hybrid.

COTA 2200 Therapeutic Approaches and Media I (4LB,2CR):

Exploration of a variety of media and therapeutic approaches for special needs populations. Activity analysis and adaptation of activities are practiced extensively. Types of activities explored include play, education, daily living skills, social participation, work and leisure. Use of the Occupational Therapy Practice Framework is introduced and applied to practice. No prerequisites.

COTA 2210 Therapeutic Approaches and Media II (4L,2CR):

Continuation of implementation of the Occupational Therapy Practice Framework. A variety of media will be explored for implementation with psychosocial and pediatric populations. Activity analysis, adapting, and grading of interventions for therapeutic application for these populations is the focus of this class. Taken concurrently with COTA 2100 and 2350. Prerequisite: COTA 2020, 2050, 2200, 2300, 2310, and 2420.

COTA 2220 Therapeutic Approaches and Media III (6LB,3CR):

This course continues the exploration of service implementation for the occupational therapy assistant in the physical disabilities' settings. Areas studied include daily living skills, work, leisure, education, and social participation. Techniques applied in physical disabilities settings

are practiced. Taken concurrently with COTA 2330 and 2400. Prerequisite: COTA 2020, 2050, 2200, 2210, 2300, 2310, 2320, 2350, and 2420.

COTA 2300 Fieldwork Integration I (1L,2LB,2CR):

An introduction to the role of working with special needs populations in the community. An introduction to the role and professional expectations of occupational therapy assistants (OTAs), while developing professional behaviors and beginning observation skills necessary for completing community experience. This course provides fieldwork preparation integrated with classroom discussions. Students will complete community experiences. Beginning knowledge of medical terminology is studied. Offered distance learning or hybrid. Must be accepted into the OTA Program or have permission from the instructor for the spring semester.

COTA 2310 Fieldwork Integration II (4LB,2CR):

A continuation of pre-fieldwork course work and beginning preparation for Level I fieldwork. Primary focus on professional skills in community experiences and with special needs populations. Begin clinical documentation for OTA practitioners. Prerequisite: COTA 2300.

COTA 2320 Fieldwork Integration III (4LB,2CR):

Designed to prepare students for Level I and II fieldwork experiences. Students will complete Level I fieldwork in psychosocial and pediatric settings. Continuation of documentation concepts. Taken concurrently with COTA 2100 and COTA 2350. Prerequisite: COTA 2020, 2050, 2300, 2310, and 2420.

COTA 2330 Fieldwork Integration IV (4LB,2CR):

A continuation of clinical readiness skills. Includes Level I experience in developmental disabilities, physical disabilities and geriatric settings as well as preparation for Level II experiences. Clinical reasoning skills for transition from student to practitioner are an integral part of the course. Taken concurrently with COTA 2220 and 2400. Prerequisite: COTA 2020, 2050, 2100, 2200, 2300, 2310, 2320, 2350, and 2420.

COTA 2350 Clinical Theory and Practice I (1L,4LB,3CR):

Course examines occupational therapy theory and practice for individuals ages birth through 21 with a focus on physical disabilities and developmental dysfunction. Explores implementation of occupational therapy in a variety of settings including theory, assessment, planning treatment plan and intervention. Taken concurrently with COTA 2210 and 2320. Prerequisite: COTA 2020, 2050, 2200, 2300, 2310, and 2420.

COTA 2400 Clinical Theory and Practice II (1L,4LB,3CR):

Course examines occupational theory and practice for individuals over the age of 21 with a focus on physical disabilities, neurological impairment and aging dysfunction. Explores implementation of occupational therapy including theory, assessment, treatment planning and implementation, in a variety of settings. Taken concurrently with COTA 2220 and 2330. Prerequisite: COTA 2020, 2050, 2200, 2210, 2300, 2310, 2320, 2350, and 2420.

COTA 2420 Clinical Conditions (3L,3CR):

Specific diagnoses commonly seen by the occupational therapist practitioners are examined and application of occupational therapy techniques and theory are discussed. Prerequisite: admission into OTA Program, or permission of the OTA Program Director. Offered distance learning.

COTA 2450 Health Care Systems (3L,3CR):

Course provides exploration of the health care system and the delivery of occupational therapy services. Topics include: reimbursement, team concepts in health care, the role of the OTA within the OT department and health care environments, levels of authority and responsibility, and familiarity with alternative health care choices. Prerequisite: COTA 2020, 2050, 2100, 2150, 2160, 2200, 2210, 2300, 2310, 2320, 2350, and 2420. Offered distance learning.

COTA 2500 Fieldwork A (2L,2LB,3CR):

First of two Level II fieldwork placements. Eight weeks of fieldwork in a contracted facility.

Includes a minimum of 40 hours a week of on-site skill practice. On-line integration of learning experiences with instructor and class members is expected. Prerequisite: must have successfully completed all academic course work and Level I fieldwork.

COTA 2550 Fieldwork B (2L,2LB,3CR):

Second of two Level II fieldwork placements. Eight weeks of fieldwork in a contracted facility. Includes a minimum of 40 hours a week of on-site skill practice. On-line integration of learning experiences with instructor and class members is expected. Prerequisite: must have successfully completed all academic coursework and COTA 2500.

COTA 2975 Independent Study in OT (1-3CR):

This course provides occupational therapy assistant students the opportunities to complete independent research/study in areas of interest within the field of occupational therapy.

DIGITAL LEARNING REQUIREMENTS:

It is the student's responsibility to review daily course expectations through the syllabus and Moodle components of the class prior to class arrival. Worksheets and quiz material may be identified in Moodle. In order for a student to be successful in class, the worksheets and quiz material need to be reviewed and completed prior to arriving to class.

GENERAL INFORMATION APPLICABLE TO COMMUNITY EXPERIENCE, LEVEL I & LEVEL II FIELDWORK

Definition of Fieldwork Levels

Community Experience (CE): Community Experience is intended to provide students with experience and exposure to a variety of helping professions within the community. This experience helps validate the students' decision to pursue a career in occupational therapy. Community Experience will include fieldwork observations and assignments in different practice settings to include mental health, developmental disabilities, adult physical disabilities, geriatrics, and pediatrics. Students will complete community experience observations and assignments through video observations, participation in Wyoming Assistive Technology Resources (WATR) Lab and ECHO presentations, attending guest speakers (when applicable), observations at the Casper College Early Childhood Learning Center (ECLC) and Developmental Disability (DD) sites, attending and participating in mental health presentations and wellness activities, and completion of fieldwork assignments addressing each of the practice settings.

Level I: Level I Fieldwork experience, as required by the Standards for Accredited OTA Programs established by the Accreditation Council for Occupational Therapy Education (ACOTE), includes experiences designed as an integral part of didactic coursework for the purpose of directed observations and participation in selected activities in clinical fieldwork settings. These settings include traditional clinical settings for pediatrics, mental health, adult physical disabilities, geriatrics, developmental disabilities, non-traditional settings and/ or emerging sites. Four block assignments of fulltime one-week experiences, consisting of 35-40+ hours per week, have been organized for Level I fieldwork. Fulltime Level I fieldwork may consist of five- 8 hour/days, four- 10 hour/days, and/or potential weekends based upon the Fieldwork Educators' work schedule. These Level I fieldwork placements will be in mental health, pediatrics, adult physical disabilities and geriatrics, in addition to 16-hour placements at a developmental disability setting and an emerging site and/ or non-traditional setting, which may include developmental disabilities, mental health, geriatrics, or pediatrics.

Community Experience and Level I Fieldwork General Information

Community Experience and Level I Fieldwork are not expected to emphasize independent performance, nor are Community Experience and Level I Fieldwork considered substitutes for any part of sustained Level II Fieldwork (ACOTE C.1.11). Level I Fieldwork placements will be established approximately one month prior to pending fieldwork dates.

Qualified personnel must provide supervision for both Community Experience and Level I Fieldwork. These personnel may include, but are not limited to occupational therapists, occupational therapy assistants, psychologists, physician assistants, teachers, social workers, nurses, physicians, speech language pathologists, nurses, and physical therapists. (ACOTE C.1.10)

Community Experience and Level I Fieldwork experience, which initially provides the student with exposure to clinical practice through observation, progresses with increasing expectations of the student to include demonstrating skills in the use of selected evaluation or treatment procedures; gathering and organizing data; and examining reactions to clients, self, personnel, and the profession. Generally, the clinical facility provides observational opportunities, "hands-on" experiences as appropriate, beginning documentation with review, feedback to the student, and additional learning tasks applicable to clinical practice. The fieldwork facility cooperates

with academic assignments and provides a written evaluation to Casper College about the experience.

The focus of the learning experience includes observation, written and verbal communication, professional behaviors, and individual and/ or group participation with clients. The fieldwork facility provides the opportunity for the following:

1. basic exposure, observation, and experience with clients commonly served by occupational therapy;
2. observation and description of treatment, evaluation, and behavior of clients;
3. recognition and description of conditions of dysfunction;
4. identification of role functions of the OTR and COTA in various treatment settings. (if applicable)

Specific objectives and assignments identified by the Occupational Therapy Assistant Program faculty for Community Experience and Level I Fieldwork will be provided by the instructor of COTA 2300, COTA 2310, COTA 2320 and COTA 2330. If additional assignments are required for OTA students to complete, the FW Educator should contact the Academic Fieldwork Coordinator (AFWC) prior to giving the assignment to the student, so that the assignments may be reviewed with students and faculty. The OTA Program would like to ensure that the students have been prepared in the areas being addressed so fieldwork experiences will be successful.

To further assist with student preparation for fieldwork experiences, all OTA students have access to the Casper College OTA Program Fieldwork database, located in the OTAP Hub in Moodle. The database is accessed through the OTA students' Moodle login and provides students with information about the fieldwork sites, fieldwork requirements, fieldwork objectives, and fieldwork performance expectations (ACOTE C.1.2).

Due to the geographic location of Casper College in a rural area, the opportunities for Level I fieldwork in the immediate area are limited. Travel **WILL** be required outside of Casper, Wyoming for Level I fieldwork. Douglas, Wyoming is considered local. All travel expenses are the students' responsibility. COTA 2300 Fieldwork Integration I and COTA 2310 Fieldwork Integration II will require the students to complete Community Experience observations and assignments in each of the different practice settings. Four block assignments of fulltime one-week experiences, consisting of 35-40+ hours per week, have been organized for Level I fieldwork. Fulltime Level I fieldwork may consist of five- 8 hour/days, four- 10 hour/days, and/or potential weekends based upon the Fieldwork Educators' work schedule. These Level I fieldwork placements will be in mental health, pediatrics, adult physical disabilities and geriatrics, in addition to 16-hour placements at a developmental disability setting and an emerging site and/ or non-traditional setting, which may include developmental disabilities, mental health, geriatrics, or pediatrics.

Level II Fieldwork General Information

Level II Fieldwork: The goal of Level II Fieldwork is to develop competent, entry-level, generalist occupational therapy assistants. Level II Fieldwork must be integral to the program's curriculum design and must include an in-depth experience in delivering occupational therapy services to

clients, focusing on the application of purposeful and meaningful occupations. ACOTE requires Level I and Level II Fieldwork experiences for occupational therapy assistant students.

Requirements established in the ACOTE Guidelines for Level II Fieldwork, specific to occupational therapy assistant students, include documenting and verifying that the student is supervised by a currently licensed or otherwise regulated occupational therapy practitioner who has a minimum of 1 year full-time (or its equivalent) of practice experience as a licensed or otherwise regulated occupational therapy practitioner prior to the onset of the Level II fieldwork. The Academic Fieldwork Coordinator will ensure that the student supervisor is adequately prepared to serve as a fieldwork educator prior to the Level II Fieldwork experience. The supervising therapist may be engaged by the fieldwork site or by the educational program. (ACOTE C.1.13) Casper College OTA Program currently only completes FW placements within the United States.

All academic coursework must be completed prior to participating in the Level II Fieldwork courses.

The Casper College OTA Program will include:

1. a minimum of 16 weeks fulltime Level II Fieldwork, in a minimum of one setting if it is reflective of more than one practice area, or in a maximum of three different settings. At this time, part-time completion of Level II Fieldwork is not available. (ACOTE C.1.12)
2. all courses that are required for the A.S. in Occupational Therapy Assistant degree are required to be completed no later than the end of the summer semester of the second summer coursework. Failure to follow this progression will result in a delayed start of COTA 2500 and COTA 2550. COTA 2550 is required to be completed by the following May or within 12 months after completion of COTA courses. Extenuating circumstances will be handled on an individual basis
3. documenting and verifying that the student is supervised by a currently licensed or otherwise regulated occupational therapy practitioner who has a minimum of 1 year full-time (or its equivalent) of practice experience and is currently a licensed or otherwise regulated occupational therapy practitioner prior to the onset of the Level II fieldwork. The Academic Fieldwork Coordinator will ensure that the student supervisor is adequately prepared to serve as a fieldwork educator prior to the Level II Fieldwork experience. The supervising therapist may be engaged by the fieldwork site or by the education program. (ACOTE C.1.13)

Fieldwork Selection Policy

1. Community Experience will consist of video observations, participation in WATR lab and ECHO presentations, attending guest speakers (when applicable), observations at the Casper College Early Childhood Learning Center (ECLC) and Developmental Disability (DD) sites, attending and participating in mental health presentations and wellness activities, and completion of fieldwork assignments addressing each of the practice settings.
2. Level I Fieldwork is selected by the academic fieldwork coordinator (AFWC), who also serves as the instructor of the COTA 2320 Fieldwork Integration III and COTA 2330 Fieldwork Integration IV courses, and in collaboration with the OTA Program faculty. Placement decisions are determined by assessment of a student's needs, strengths,

possible housing options, professional attributes and personality that are idealistic for success at the Level I fieldwork site. In the fall semester, students participate in two, fulltime fieldwork rotations in pediatrics and mental health. In the spring semester, students participate in four Level I fieldwork rotations in adult physical disabilities, geriatrics, developmental disabilities and non-traditional and/ or emerging sites. There are two, fulltime fieldwork rotations in adult physical disabilities and geriatrics; and a total of 16 hours in developmental disability, and an emerging site and/ or non-traditional setting. An emerging site is considered any place where there is currently no occupational therapy practitioner working, but potentially could work.

3. Level II Fieldwork is selected through a lottery system to ensure equitable opportunity for all students. All OTA students have access to the Casper College Fieldwork Database, which is accessed through the OTA students' Moodle login. The Fieldwork Database provides students with information about the clinical sites, fieldwork requirements, fieldwork objectives and performance expectations, to assist in choosing appropriate Level II fieldwork placements. (ACOTE C.1.2) For the lottery system, a meeting will be held during the first spring semester where lottery numbers will be drawn; the student who is number one will have first choice of the clinical fieldwork facility the student selected and so forth, down the list of students. The OTA student will provide a list of the student's top two choices for each Level II fieldwork experience. The Academic Fieldwork Coordinator will meet individually with each student to assign and confirm placement. Students may complete only one placement in Casper, WY. Douglas, Wyoming is also considered a local site.
4. The following criteria will be implemented in determining Level I/II Fieldwork placement.
 - a. The student will not be able to complete a Level I/II Fieldwork placement where the student is/or has been employed at the fieldwork site or has family members that are currently employed at this site.
 - b. The student will not be able to complete a Level I/II Fieldwork placement where the student or immediate family members have or had treatment at the facility in the past three years.
5. It is the students' responsibility to notify the OTA Program Academic Fieldwork Coordinator of any fieldwork site that may affect the above policy. Failure to comply with requested information could lead to termination of both Level I and Level II fieldwork placements and/ or OTA Program registration.

Fieldwork Hardship Policy

The Casper College OTA Program understands that some students may face a hardship for Level I and Level II fieldwork travel. Although students may have reasons that travel may not be ideal for fieldwork, students are encouraged to consider the strengths and opportunities fieldwork sites outside of the immediate area have to offer. If a student must stay in a particular geographic area, the option to sit out a rotation always exists for the benefit of the student. Choosing to sit out a rotation will result in a delay of graduation. If a student feels a hardship exists, the student must follow the process below:

- a. Reflect on whether the issue is a true hardship. Finances are not considered a hardship except under extreme circumstances.

- b. Complete a letter requesting fieldwork sites within the immediate area and identify reason for hardship for each Level I and/or Level II fieldwork placement.
- c. The OTA Fieldwork Committee will attempt to meet all hardships, as fieldwork sites are available.

Student Health and Wellbeing

The health and wellbeing of our students is important to us! Casper College students have resources to support their overall health and wellbeing through the **Casper College Wellness Center**. The Wellness Center, located in the **Student Union/UW at Casper building, Room 202, (phone: (307) 268-2267)** provides **Counseling Services** and **Health Services**. The Counseling Services consist of counselors who offer individual, couple, and group counseling, as well as consultations and crisis intervention. The Health Services offers an on-site registered nurse, as well as weekly appointments available with a general physician's clinic, staffed by the University of Wyoming Family Medicine Residency Program. The Health Services offered include physical exams, administration of immunizations, strep throat testing, blood pressure monitoring, urinalysis, emergency first aid, and coordination of medical care with community resources.

During fieldwork experiences, if a student and/ or fieldwork educator has concerns about the student's health or well-being, they are encouraged to **contact the academic fieldwork educator at (307) 268-2054** for further assistance on resources available to the student.

Professional Behaviors: Requirements for Occupational Therapy Assistant Students

The OTA program is committed to developing practitioners who embody the highest standards of the profession. When a student's professional behavior or academic conduct falls below these standards, the program utilizes a supportive accountability process designed to realign the student with professional expectations.

- **Level 1: Collaborative Reflection & Success Planning** Upon the first instance of non-compliance with program policies or professional behaviors, the student will meet with faculty to identify the root cause of the challenge. Together, they will complete a Student Success Plan to establish clear goals and identify any necessary wellness or academic resources. (Three yellow, or two pink sheets)
- **Level 2: Structured Probation & Mentorship** If the behavior persists or a second offense occurs, the student will be placed on Professional and/or Academic Probation. This stage involves an intensified Student Success Plan, featuring closer mentorship and more frequent check-ins to ensure the student has the structure needed to succeed. (an additional three yellow, or two pink sheets)
- **Level 3: Program Dismissal** The OTA program is responsible for ensuring that all graduates are safe, ethical, and professional. If the previous levels of intervention do not result in the required professional growth, the student will be dismissed from the program to protect the integrity of the profession and future patient safety.

A student must demonstrate an understanding and acceptance of these behaviors, as well as agree to abide by these behaviors in order to complete fieldwork at any level. These behaviors include:

- a. Compliance with expected dress code (no blue jeans, tank tops, shorts, t-shirts with advertisements or logos in the clinical fieldwork setting). Students must wear Casper College OTA Program polo shirts, dress pants, and a name tag.
- b. Responsible and dependable attendance, promptness and confidentiality demonstrated in the classroom and fieldwork settings.
- c. Handles personal and professional frustration in appropriate time and place.
- d. Communicates effectively, verbally and non-verbally with faculty and fieldwork educators. Uses feedback appropriately such as initiating contact, asking questions, seeking feedback, and accepting constructive criticism.
- e. Demonstrates respectful communication with classmates, faculty and fieldwork educators, which includes no derogatory comments, avoiding judgments and verbalizing feelings constructively.
- f. Students will follow the Casper College OTA Program cell phone policy at their fieldwork site, if the site does not have their own policy.

These behaviors will be reviewed with the student each semester in preparation for fieldwork. If noncompliance is identified throughout the program, students will face disciplinary action.

Professional Appearance

Off-Campus Class Setting: Community Experience, Level I and Level II Fieldwork

During fieldwork placements, students must abide by the Casper College Occupational Therapy Assistant Program Dress Code Policy. Failure to comply will result in the disciplinary process.

1. Clothing

- a. OTA Program polo shirts, dress pants (khaki or colored jeans- no blue jeans)- clothing must be neat, clean and wrinkle free.
- b. Style and fit should be appropriate to the size of the individual. The dress or skirt should reach to the bottom of the knees or below. The hem of the pants cannot touch the floor when standing.
- c. Undergarments, chest hair, cleavage and/or gluteal cleft should not show when leaning, squatting or bending over.
- d. Students are required to follow the Casper College OTA Program Dress Code during fieldwork experiences, program sanctioned activities, community events, or in the presence of guest speakers.
- e. The Casper College OTA Program policy supersedes other facility policies.

2. Shoes

- a. The toe must be closed. Rubber soles are preferred. Be sure shoes and shoelaces are clean and of a neutral color.

3. Personal Hygiene

- a. A neat, clean, fresh-smelling person is extremely important to the professional demeanor of an occupational therapy practitioner.
- b. No perfume or heavily perfumed aftershave or lotion is to be worn.
- c. No lingering odors of any kind are allowed on the skin or the breath. Odors include but are not limited to: tobacco products, topical medications, oils, ointments or salves, and foods.

4. Cosmetics

- a. Cosmetics are to be used in moderation for daytime wear.

5. Fingernails

- a. Fingernails should be short and neatly trimmed. Students may wear pale nail polish only. No artificial nails are permitted. This includes all in-class sessions and all fieldwork related activities.

6. Hair

- a. Hair, including facial hair, must be neatly trimmed, clean, styled for safety, and contained to avoid client contact.
- b. No yarn ties, ribbons or scarves are allowed. Clips and scrunchies are allowed.
- c. All students' hair must be of a natural color; looking natural, even if it is not actually the student's natural color.
- d. Extremes in style and color must be avoided. No distracting hair allowed.

7. Jewelry

- a. Watch- recommended to be worn with either a digital or sweep second hand. Students are discouraged from using a Smartwatch during fieldwork experiences. If a student chooses to use a Smartwatch, the student will need to get approval from the Fieldwork Educator prior to the fieldwork experience. Students who have received approval to wear a Smartwatch are not to access the features of the watch for personal use during the fieldwork experience (i.e.: texting, social media, phone calls, etc.)
- b. Piercings- a maximum of two pairs of posts may be worn in the earlobes only; no other visible body piercings (including the tongue and nose) are allowed.
- c. Rings- wedding rings may be worn. No elevated decoration that may cause problems or injury is allowed at the fieldwork sites.
- d. Bracelets- no bracelets will be worn.
- e. Necklaces- small, neat chains and pendant necklaces that will not come in contact with the client or become entangled during direct client care may be worn.

8. Tattoos

- a. Tattoos must be covered.

9. Identification

- a. Casper College OTA Program name tags must be worn.

10. Smoking

- a. There is to be NO smoking during any fieldwork time. Students may not leave the fieldwork setting to smoke. Students may not subject others to secondhand smoke. Students must refrain from smoking prior to fieldwork and/ or fieldwork activities as the smoke can cling to clothes and be an irritant to clients and others.

11. Chewing Gum

- a. If the student feels the breath enhancement is necessary, then breath mints are suggested, as chewing gum is prohibited.

12. Cell Phones

- a. During fieldwork experiences, students are not allowed to have their cell phones in the clinical areas. Cell phones should be left in the student's car or the fieldwork office, if approved by the fieldwork educator.

No one may alter this dress code under any other circumstance. Students are a representative of the Casper College OTA Program and have an effect on all other faculty and students. Casper College OTA Program dress code supersedes all facility dress requirements.

Student Fieldwork Responsibilities

The student is the learner who is enrolled in a course of study at an educational institution leading to a degree in occupational therapy assistant. The student is expected to collaborate with the Fieldwork Educator and the Academic Fieldwork Coordinator to ensure compliance with fieldwork experience requirements.

The student is responsible for the following during Level I and Level II Fieldwork when applicable:

1. Being registered one month prior (tuition paid) to the start date of the fieldwork rotation.
2. Contacting the fieldwork site to confirm the Level I and Level II Fieldwork experience dates one month in advance of the starting date.
3. Reviewing the OTA Program Fieldwork Database prior to the fieldwork experience to prepare for Level I and Level II fieldwork experiences. The fieldwork database is accessed through the OTA students' Moodle login and provides students with information about the fieldwork sites, fieldwork requirements, fieldwork objectives, and fieldwork performance expectations to assist in choosing appropriate Level II fieldwork placements. (ACOTE C.1.2)
4. Complying with all policies and procedures of the fieldwork site including HIPAA and confidentiality per facility standards.
5. Fulfilling all duties and assignments made by the Fieldwork Educator and Academic Fieldwork Coordinator, within the time limit specified.
6. Notifying the fieldwork site and Casper College OTA Program of current physical address, telephone number and email.
7. The student will obtain and submit to the Academic Fieldwork Coordinator, within one week before the start of the fieldwork date, any additional immunization or health records required by the site.
8. The student is encouraged to notify the fieldwork educator of any known disabilities, diagnoses, or any new health-related conditions prior to arrival at the site.
9. Contact the Academic Fieldwork Coordinator and Fieldwork Educator if illness, personal emergency, or bad weather will interfere with their completion of the assigned placement. The students are expected to complete all hours of the fieldwork placement. Options for make-up work include:

- a. Additional assignments at site (i.e.: another discipline)
- b. Adjustment of hours (i.e.: four, 10-hour days, work weekends)
- c. Alternative fieldwork site assignments to achieve hours

Before a student is allowed to begin fieldwork, some sites may require the student to provide the fieldwork site with the following information:

- a. Physical examination report
- b. Immunization record
- c. Measles, Mumps, Rubella (MMR) vaccine or titer
- d. Tuberculin skin test results
- e. Hepatitis B titer and vaccine or waiver of vaccine
- f. Tetanus, diphtheria and pertussis (Tdap) vaccine
- g. Chickenpox vaccine or titer/ Proof of chickenpox
- h. COVID-19 testing (negative), proof of vaccination, or exemption
- i. Evidence of personal health insurance
- j. Current CPR card (AHA BLS for the Healthcare Provider)
- k. Proof of academic fieldwork registration
- l. Drug screening
- m. Criminal background check
- n. Wyoming Department of Family Service (DFS) Screening
- o. Interview prior to acceptance at the fieldwork site
- p. Transcripts-Casper College cannot provide these but fieldwork sites may require and request them directly from students

Fieldwork Attendance Policy for Students

While performing fieldwork experiences, the students are **not allotted any days for personal leave, illness, etc.** If a situation should arise requiring the student to miss fieldwork, the student will contact the Fieldwork Educator immediately, followed by contacting the Academic Fieldwork Coordinator or the OTA Program Director. The Fieldwork Educator must first approve personal absences and the hours missed are expected to be made up. If a student is in a fieldwork setting and is ill, the student must inform the Fieldwork Educator at the fieldwork facility by 8:00 a.m. or the time identified by the fieldwork facility. Students are not expected to make up hours missed secondary to national or state holidays.

Fieldwork Evaluation Policy for Students

All occupational therapy assistant students are required to participate in and successfully complete the COTA 2300, COTA 2310, COTA 2320, and COTA 2330 Fieldwork Integration courses. These courses require Community Experience and Level I Fieldwork where OTA Program faculty and/or Fieldwork Educators will evaluate the student's performance and provide comments on various expected professional behaviors that are integral in the occupational therapy field of practice. For Community Experience, the students' performance will be evaluated on the fieldwork assignments and the Professional Behavior rubric completed in each fieldwork course. Students must successfully complete all fieldwork assignments with a score of 75% or higher and demonstrate appropriate professional behaviors in order to pass the course. When students complete Community Experience at the fieldwork site, a student's performance will be evaluated using the Community Experience Evaluation form. On the Community Experience Evaluation form, if at any time a student receives more than one item below a "2" or more than two items below a "3" on their evaluation, the student is required to meet with the OTA Program faculty and complete a remediation plan of areas of concern prior to repeating the fieldwork experience.

On the Level I Fieldwork Evaluation, if a student receives more than two items below a "B- Below Standards" or more than five items below a "M- Meets Standards" on their evaluation, the student is required to meet with the OTA Program faculty and complete a remediation plan of areas of concern prior to repeating the fieldwork experience. The

remediation plan will be determined by the OTA Program faculty. The student will be required to repeat the unsuccessful fieldwork rotation, within the semester the failure took place in. Depending on the timing of the fieldwork failure, the student may be required to complete the fieldwork rotation outside of the typical course schedule. In this situation, the student will receive a course grade of Incomplete "I", until successful completion of the fieldwork experience. Students cannot continue in the OTA Program until all coursework and fieldwork requirements are successfully met.

A student may only repeat one fieldwork experience in a course. If a student is required to repeat more than one fieldwork experience in a course due to unsuccessful completion, the student will not pass the fieldwork course. A student may not fail more than one fieldwork experience in two semesters. If a student fails more than one fieldwork experience in two semesters, the student will be required to meet with the OTA Program faculty and the process of disciplinary action for the OTA students will be followed.

Automobile Insurance Requirement for Occupational Therapy Assistant Students

Automobile insurance and a current copy of the student's driver's license are required by the state for students driving to and from fieldwork sites. Casper College is not held accountable for any injuries or damages while traveling during fieldwork experiences. The student is required to provide a current copy of auto insurance to the Academic Fieldwork Coordinator prior to leaving on Level I and Level II Fieldwork experiences. *Failure to comply with the insurance will result in the termination of the fieldwork experience!*

Inclement Weather and Traveling to Fieldwork Sites

All students traveling to fieldwork sites outside of the city of Casper are encouraged to monitor traveling conditions via the national weather service and WYDOT roads and travel. It is advised that the student take a proactive approach when traveling. This may require the student to leave earlier or stay longer at fieldwork sites to avoid traveling in inclement weather. If the student decides it is unsafe to travel, the fieldwork hours will be made up or re-assigned. Please do not risk your safety in order to travel to fieldwork sites in inclement weather. To cancel a fieldwork shift because of travel issues, call the fieldwork site, as well as notify the Academic Fieldwork Coordinator at Casper College as early as possible.

Malpractice Insurance

Malpractice insurance for OTA students is provided through Casper College. Students may also want to carry their own malpractice insurance.

Criminal Background Checks/Department of Family Service Screening

Criminal Felony background checks and Department of Family Service screenings are required before placements at CE, Level I and Level II fieldwork sites. The student needs to submit these two forms to the Academic Fieldwork Coordinator, through the Moodle OTAP Hub prior to the fieldwork experience. *Failure to comply with the background check and DFS screening will result in the termination of the fieldwork experience.* The fee for this process will be provided during the orientation process. Each year the expected completion date will be provided to new students during the orientation process.

Health and Medical Care Requirements for Occupational Therapy Assistant Students

In accordance with the recommendations of the American Academy of Pediatrics and the United States Public Health Services, Casper College requires proof of immunization with MMR prior to registration of six hours or more. Persons born in 1957 or later must show proof of immunization after 15 months of age. A person born prior to 1957 is considered to be immune. Please check the Casper College catalog for details concerning this requirement.

The Casper College Student Health Services Office is maintained in the Wellness Center where a registered nurse is in charge. The services of a licensed MD are available free of charge to degree-seeking students one day a week for a three-hour period.

While Casper College does not have additional medical requirements, many of the fieldwork sites do. It is recommended the occupational therapy assistant students have a current physical. The OTA students must have the following required vaccinations and are required to submit these forms to the Academic Fieldwork Coordinator, through the Moodle OTAP Hub, who will manage these items. These will include the following: Tuberculin 2 step (TB) test, completion of the Hepatitis-B (3 shots) series, Tetanus, Diphtheria, and Pertussis (Tdap) vaccinations, yearly seasonal flu shot, proof of the Measles, Mumps and Rubella (MMR) vaccination, chickenpox vaccine/titer or proof of chickenpox (Varicella). Almost all facilities require proof of a TB test within the last twelve months. Many facilities also require completion of the Hepatitis-B series. In addition, students may be required to complete drug screenings and any additional testing as required by the facility. These services are available through student health for a low cost. Services are available on campus, but not accessible at all sites. Students complete a Latex allergy questionnaire and complete a Blood Borne Pathogen quiz prior to fieldwork placement. *Failure to comply with the above will result in the termination of the fieldwork experience.*

Students are required to carry and provide proof of a medical health insurance policy throughout the duration of the OTA Program and all fieldwork. Casper College and the fieldwork sites will not be held responsible for illness or injury while the student is completing fieldwork. Students will be required to submit proof of health insurance to the Academic Fieldwork Coordinator, through the Moodle OTAP Hub, who will manage this item. It is mandated that students have health insurance for the duration of the Occupational Therapy Assistant Program. *Failure to comply with the insurance will result in the termination of the fieldwork experience.*

Accommodations

If a student is requesting accommodations for the fieldwork courses, the student must first consult with the college's Disability Services Counselor located in the Gateway Building, Room 342, (307) 268-2557, jennifer.mcleod@caspercollege.edu. The Disability Services Counselor is responsible for reviewing documentation provided by students requesting accommodations and determining eligibility for accommodations. After meeting with the college's Disability Services Counselor and based upon their recommendations, students are encouraged to meet with the Academic Fieldwork Coordinator to discuss learning needs and what reasonable accommodations are needed. If the student desires, the Academic Fieldwork Coordinator will work collaboratively with the fieldwork educator to discuss essential functions and develop a plan to implement reasonable accommodations that are needed at the fieldwork site. The fieldwork site will determine if they are able to provide accommodations based upon available resources. If the fieldwork site is unable to provide the requested accommodations, the Academic Fieldwork Coordinator will work with the student for alternate placement. Requests for accommodations should be made within a timely manner prior to the fieldwork placement.

The OTA program at Casper College ensures that every student—whether learning in a Casper classroom or at a distant fieldwork site—has a clear, equitable pathway to support services. This process begins at program entry and continues through fieldwork completion. While Casper College DSS determines eligibility, the OTA Program is responsible for the implementation of these accommodations.

Phase 1: Orientation Meeting

During the initial mandatory program orientation, all students are introduced to the Casper College Wellness Center and Disability Support Services (DSS). Students receive a comprehensive resource flyer containing direct contact numbers and the physical location of the Student Success Center in the Walter H. Nolte Gateway Center. To ensure equitable access for distance or hybrid students, this orientation information and the resource flyer are also permanently housed on the program's digital Learning Management System (LMS) Moodle OTAP Hub, on the OTA Program Webpage, in the Student Handbook, and the Fieldwork Educator Manual.

Phase 2: Self-Identification and Academic Accommodations

When a student requires academic or physical accommodations, the program directs them to the DSS office (Gateway Center, Rm. 342). Following an individualized review of the student's medical or psychological documentation, a Services Agreement is created. The student then provides this signed agreement to their faculty members. The program documents these accommodations and implements them in the classroom and lab—providing everything from assistive technology (such as smart pens or screen readers) to alternate testing environments—ensuring the student has the tools necessary to meet the didactic rigors of the curriculum.

Phase 3: The Success Plan and Wellness Intervention

If a student faces academic or personal challenges, the program initiates a Student Success Plan. This is a collaborative, documented procedure where faculty and the student identify barriers to success. As part of this plan, students are formally referred to the Wellness Center for counseling or health services. For students not physically on campus, the program facilitates these connections via phone or virtual consultation, ensuring that "distance" never becomes a barrier to well-being. Please refer to the student wellbeing section for more information.

Phase 4: Fieldwork Transition and Equitable Access

As students transition to fieldwork experiences, the program ensures that support services "travel" with them. If a student has an existing Services Agreement, the Academic Fieldwork Coordinator (AFWC) engages in an interactive process with the student to determine how those accommodations will be reasonably implemented in a clinical setting. Furthermore, if a student's well-being is compromised while off-site, the AFWC acts as the primary point of contact (307-268-2054) to help the student and fieldwork educator navigate local health resources or tele-health options, ensuring that the student is supported regardless of their geographic location.

Occurrence Report

If an occurrence occurs while a student is participating in fieldwork, the student is required to contact the Fieldwork Educator immediately and to follow the policies and procedures established by the facility. Students will also need to complete the Occurrence Report form, contact the Academic Fieldwork Coordinator, and return the form to the Academic Fieldwork Coordinator as soon as possible. A copy of the Occurrence Report form is located in the appendix. The Academic Fieldwork Coordinator will notify the Program Director and Dean of Health Science of the occurrence.

Disciplinary Action for Occupational Therapy Assistant Students

Failure of a student to comply with the expected professional behaviors, OTA Program policies/ procedures and site-specific rules will result in a three-step disciplinary action.

1. **Level 1: Collaborative Reflection & Success Planning:** Upon the first instance of non-compliance with program policies or professional behaviors, the student will meet with faculty to identify the root cause of the challenge. Together, they will complete a Student Success Plan to establish clear goals and identify any necessary wellness or academic resources. (Three yellow, or two pink sheets)
2. **Level 2: Structured Probation & Mentorship:** If the behavior persists or a second offense occurs, the student will be placed on Professional and/or Academic Probation. This stage involves an intensified Student Success Plan, featuring closer mentorship and more frequent check-ins to ensure the student has the structure needed to succeed. (an additional three yellow, or two pink sheets)
3. **Level 3: Program Dismissal:** OTA program is responsible for ensuring that all graduates are safe, ethical, and professional. If the previous levels of intervention do not result in the required professional growth, the student will be dismissed from the program to protect the integrity of the profession and future patient safety.

Occupational Therapy Assistant Student Financial Obligations for Fieldwork

1. Tuition is charged for Level II fieldwork experiences. Students receive 6 credit hours for both eight weeks of Level II fieldwork experience. The OTA student is responsible for all expenses, including but not limited to: housing, gas, food, etc.
2. Students are responsible for their own transportation to fieldwork sites, as required through the program. These fieldwork sites are located in Wyoming and the surrounding geographical areas. For overnight trips and trips out of town, students may share the cost of gas and other expenses. Students are responsible for their own accommodations. Travel expenses for required fieldwork experiences in practicum are considerable, so students should plan their budgets accordingly.

Academic Fieldwork Coordinator's Responsibilities

1. Provide fieldwork manuals and student supervision resources to the fieldwork facility, fieldwork educators, and students that outline the standards of performance and guidelines for the Level I and /or Level II Fieldwork.
2. Oversee all OTA Program Clinical Instruction Agreements to include establishing new agreements, conducting annual reviews of existing agreements, and managing terminating agreements when necessary. All OTA Program agreements will be reviewed annually by the AFWC to ensure compliance. OTA students will not be placed in a clinical site until a fully executed agreement is in effect.
3. Provide documentation of professional liability insurance for the students upon request.
4. Document and verify that the student is supervised by an occupational therapy practitioner who has a minimum of 1 year full-time (or its equivalent) of practice experience as a licensed or otherwise regulated occupational therapist or occupational therapy assistant prior to the onset of the Level II fieldwork. Ensure that the student supervisor is adequately prepared to serve as a fieldwork educator prior to the Level II Fieldwork experience. The supervising therapist may be engaged by the fieldwork site or by the educational program. (ACOTE C.1.13)
5. Ensure that the ratio of fieldwork educators to students enables proper supervision and provides protection of consumers, opportunities for appropriate role modeling of occupational therapy practice, and the ability to provide frequent assessment of student progress in achieving the stated fieldwork objectives. (ACOTE C.1.7). The Casper College Fieldwork Program Supervision Policy allows no greater than a 1:2 fieldwork educator to student ratio to ensure proper supervision and protection of consumers.
6. The academic fieldwork coordinator will collaborate with the fieldwork facility to establish a documented plan to provide supervision in a setting where no occupational therapy services exist. The documented plan for provision of occupational therapy assistant services will include supervision by a currently licensed or otherwise regulated occupational therapist or occupational therapy assistant (under the direction of an occupational therapist) with at least 3 years full-time or its equivalent of professional experience prior to the Level II fieldwork. Supervision must include a minimum of 8 hours of direct supervision throughout each week of the fieldwork experience and will be documented and verified using the Level II Fieldwork Supervision Time Sheet. An occupational therapy supervisor must be available, via a variety of contact measures, to the student during all working hours. An onsite supervisor designee of another profession must be assigned while the occupational therapy supervisor is off site. (ACOTE C.1.16). The academic fieldwork coordinator will ensure compliance of the documented plan.
7. Inform students of the confidential nature of all facility and client records and information.
8. Provide the fieldwork facility information regarding student's experience or academic background or both prior to placement, as authorized by the student.

9. Place only students who have satisfactorily completed all required prerequisite courses and any other academic requirements and have been recommended by faculty for placement in the Community Experience, Level I and/or Level II Fieldwork.
10. Notify students of required health screenings and/or additional requirements after receiving information from the facility. Students will provide documentation of these requirements and immunizations to the Academic Fieldwork Coordinator and to the clinical site when requested. The Academic Fieldwork Coordinator will manage these forms through the Moodle OTAP Hub.
11. Advise students of their responsibilities for complying with the existing rules, regulations and guidelines for this agreement. These responsibilities include but are not limited to confidentiality, the student's responsibility in providing the facility with goals and objectives for the affiliation, proof of health insurance coverage and current Cardiopulmonary Resuscitation (CPR) certification.
12. The *AOTA Level I Fieldwork Competency Evaluation* and the *AOTA Fieldwork Performance Evaluation of the Occupational Therapy Assistant Student* form are to be received within one week of student's completion of Level I and Level II Fieldwork experience. The AFWC will review the evaluation of the student's performance prior to the following fieldwork rotation to determine if the student will be able to pass the placement or if additional remediation is needed. This information will be shared with the Program Director and OTA faculty. If the evaluation form is not received, the AFWC will contact the fieldwork site.
13. After all students have met individually with the AFWC and have made their fieldwork choices, the Academic Fieldwork Coordinator sends an official Level II Fieldwork Reservation Form to the fieldwork educator in a given fieldwork facility requesting placement for the Level II Fieldwork rotation. If the fieldwork educator can accommodate the student, the form is returned to Casper College bearing the signature of that fieldwork educator and/ or fieldwork coordinator. Once the signed form is received by the AFWC, the agreement is binding for all persons involved: Casper College, the OTA student, and the fieldwork site. Requested changes by the OTA student can be made only by appeal to the fieldwork committee.
14. The Academic Fieldwork Coordinator will notify students of required interviews for acceptance of a Level II Fieldwork rotation. Some facilities have some reservations about accepting students. Some will not accept a student unless he/she has spent two or three full days at the facility. This serves a dual purpose. It gives the OT personnel at the facility the opportunity to determine whether the student can meet their facility's expectations and gives the student the opportunity to learn whether he/she will be able to function within the facilities' learning environment and whether that facility meets his/her educational goals.

Selecting New Fieldwork Sites

The process for establishing and evaluating new Level I and Level II fieldwork sites follows a three-phase approach to ensure alignment with the OTA Program curriculum and fieldwork education requirements. During the first phase of the process, the Academic Fieldwork Coordinator (AFWC) reviews the OTA Program curriculum, the purpose of Level I and/ or Level II fieldwork, fieldwork expectations and objectives, and potential learning opportunities with the potential fieldwork educator (FWE)/facility representative. If the potential FWE/facility representative confirms their ability to provide the requisite learning experience, the process moves to additional information gathering. In the second phase, additional information of the FW site and FWE is gathered through completion of the AOTA Fieldwork Data Form, during site visits using the Official FW Site Visit form, phone calls and/or electronic communication. In the final phase, the OTA student will complete a Level I or Level II FW placement at the new FW site. For a new Level I FW site, upon completion of the Level I FW experience at the new site, the OTA student completes a verbal and written evaluation of the fieldwork site/fieldwork experience/FWE. The verbal evaluation is documented by the AFWC on the Level I Fieldwork Review form during FW Integration of the COTA 2320 and COTA 2330 courses. The written evaluation is submitted via the Student Evaluation of Level I Fieldwork form and is reviewed by the AFWC. The AFWC and OTA Program faculty meet each semester to discuss feedback from the OTA students on whether the site meets the curriculum and fieldwork needs of the OTA Program. The same procedure is followed for establishing new Level II fieldwork sites for phases one and two.

Upon completion of the Level II FW experience, the AFWC reviews the *AOTA Student Evaluation of Fieldwork Experience (SEFWE)* and the *AOTA Student Evaluation of the Fieldwork Educator* submitted by the OTA student. The AFWC presents the results of both evaluations to the OTA Program faculty during a faculty meeting. The OTA program faculty determines if the FW site is suitable in meeting the OTA Program's curriculum and FW needs.

Fieldwork Supervision Policy

Fieldwork educators are encouraged to consider their current workload before accepting occupational therapy assistant students for fieldwork experience. The faculty at Casper College asks that no fieldwork educator compromise their workload, consumer safety, or the students' educational process due to over commitment. To maintain the quality and effectiveness of student supervision, the fieldwork educator will not exceed supervising more than a 1:2 fieldwork educator to student ratio at any given time (1 Fieldwork Educator: 2 Students). Per the Casper College Fieldwork Program Supervision Policy, this ratio enables proper supervision, provides protection to consumers, provides opportunities for appropriate role modeling of occupational therapy practice, and frequent assessment of student progress in achieving the stated fieldwork objectives (ACOTE C.1.7).

Evaluation of Fieldwork Sites by the Casper College Academic Fieldwork Coordinator

Casper College has implemented a method to evaluate fieldwork facilities. An evaluation is typically done to assess program effectiveness, assist decision-making regarding the program, and improve future programming. The purpose of this endeavor is to determine and measure the kinds of experiences which are offered at fieldwork facilities as compared to the Casper College Occupational Therapy Assistant Program student competencies for the entry-level occupational therapy assistant.

The information gathered is utilized in the following ways:

1. Assist students in the fieldwork selection process.
2. Inform fieldwork facilities of learning experiences which are being offered in the Casper College Occupational Therapy Assistant curriculum.
3. Determine if fieldwork facilities are offering learning experiences compatible with those presented in the Casper College Occupational Therapy Assistant curriculum. Each fieldwork facility will be evaluated by a representative of the Casper College Occupational Therapy Assistant Program on a rotational basis every five years (as able). Arrangements for conducting an on-site fieldwork evaluation will be communicated prior to the visit.
4. Provide the Casper College Occupational Therapy Assistant Program a method of objectively evaluating existing fieldwork facilities. The fieldwork site visit form will be completed utilizing an interview format with a Casper College Occupational Therapy Assistant Academic Fieldwork Coordinator and the Fieldwork Educator. The information is to be completed as if a student is currently completing a Level II Fieldwork at the facility.
5. Provide the Casper College Occupational Therapy Assistant Department an instrument to guide faculty in selecting new fieldwork facilities in an objective manner. Data will be gathered in the areas of diagnostic categories, assessments and interventions. Casper College Occupational Therapy Assistant faculty developed evaluation criteria. When the Occupational Therapy Assistant faculty of Casper College visits each fieldwork site, the form will be completed through discussion with the director of Occupational Therapy and/or student fieldwork educator.
6. Following the site visit, the Academic Fieldwork Coordinator will meet with the OTA Program faculty during a faculty meeting and discuss the data found during the site visit. A copy of the evaluation form and suggestions regarding the fieldwork program at the facility are available upon

request. If a facility does not meet the evaluation criteria, the site will be discussed at a faculty meeting and a decision will be made as to whether to continue to consider the site under special circumstances or whether or not the facility should remain as a fieldwork site.

7. In addition, the AFWC documents diagnoses, evaluations, interventions, and recommendations on the Fieldwork Review form. This is completed during the course integration upon completion of Level I and Level II fieldwork for all facilities. This information serves to update the faculty and students as to the experiences currently offered at each facility. Feedback from the students who have completed fieldwork at a facility are also considered in reviewing whether the facilities' fieldwork program meets the educational needs of the students. Review of fieldwork facilities, during faculty meetings, will be ongoing and will take into account all of the above considerations. If a facility is discontinued, the site will be informed of the reasons for such a decision, and if a facility chooses to withdraw from offering fieldwork experiences, they are also expected to notify the Casper College Occupational Therapy Assistant Program of this decision and reasoning behind it. The information concerning that facility will then be removed from the fieldwork manuals and placed in an inactive file.

Fieldwork Facility Responsibilities

The general objectives of the fieldwork education facility, described in the Guide to the Preparation of Fieldwork Objectives for Occupational Therapy Students, are as follows:

1. Review periodically the contractual agreement between Casper College institution and the fieldwork education facility and ensuring that these agreements are signed.
2. Provide supervision of students by qualified personnel.
3. Ensure that the supervision of students does not exceed a 1:2 fieldwork educator to student ratio per the Casper College Fieldwork Program policy.
4. Provide students the opportunity to practice skills learned in school with actual clients.
4. Verify the knowledge students acquire in the academic setting.
5. Provide the opportunity for students to expand the knowledge acquired in the academic setting.
6. Provide students with the opportunity to develop the interpersonal skills and attitudes necessary for effective interaction with persons having physical, psychosocial, or developmental deficits; people with different values and backgrounds; and with other members of the health care team.
7. Provide the students with feedback regarding their on-the-job performance and to provide guidance for modifying that performance to improve effectiveness.
8. Promote the development of self-evaluation and problem-solving skills.
9. Provide the student with role models in direct service to clients.
10. To ease the transition from the role of students to the role of occupational therapy practitioner.
11. To provide for a substitute supervisor in the event of the primary supervisor's absence.
12. To contact the Academic Fieldwork Coordinator regarding concerns or changes in supervision.

13. The student's performance objective is to meet the general objectives stated for the curriculum as they apply to the fieldwork facility.
14. The academic fieldwork coordinator will collaborate with the fieldwork facility to establish a documented plan to provide supervision in a setting where no occupational therapy services exist. The documented plan for provision of occupational therapy assistant services will include supervision by a currently licensed or otherwise regulated occupational therapist or occupational therapy assistant (under the direction of an occupational therapist) with at least 3 years' full time or its equivalent of professional experience prior to the Level II fieldwork. Supervision must include a minimum of 8 hours of direct supervision each week of the fieldwork experience and will be documented and verified using the Level II Fieldwork Supervision Time Sheet. An occupational therapy supervisor must be available, via a variety of contact measures, to the student during all working hours. An on-site supervisor designee of another profession must be assigned while the occupational therapy supervisor is off site. (ACOTE C.1.16) The academic fieldwork coordinator will ensure compliance of the documented plan.

Fieldwork Educator Responsibilities

The administrative responsibilities of the fieldwork educator include, but are not limited to the following:

1. Collaborating with the Academic Fieldwork Coordinator in the development of a program that provides the best opportunity for the implementation of theoretical concepts offered as part of the academic educational program and curriculum design.
2. Preparing, maintaining, and sending to the Academic Fieldwork Coordinator current information regarding the facility. This includes: AOTA Fieldwork Data Form, additional fieldwork site information and/ or requirements, and student objectives for Level I and Level II Fieldwork rotations in collaboration with the AFWC.
3. Scheduling students in collaboration with the Academic Fieldwork Coordinator.
4. Establishing objectives in collaboration with the Academic Fieldwork Coordinator for the fieldwork experience and identifying the philosophy of the fieldwork facility.
5. Providing protection of consumers of OT through proper supervision and role modeling for OT services. Ensure that the fieldwork educator to student ratio is no greater than a 1:2 fieldwork educator to student ratio per the Casper College Fieldwork Program Supervision Policy.
6. Contributing to the evaluation of each student at midterm and completion of the fieldwork experience. For Level II fieldwork, the Fieldwork Educator will complete the Week 2 Progress Check In form, midterm evaluation, Week 6 Progress Check In form and final evaluation.
7. Notifying the Academic Fieldwork Coordinator of any student who is requesting to withdraw from the fieldwork site.
8. Providing regular and periodic supervision of students. Initially, supervision should be direct, then decrease to less direct supervision, as is appropriate for the setting, the severity of the client's condition, and the ability of the student.
9. If there is not an occupational therapist on site, the Casper College OTA Program will work with the facility to provide supervision of at least eight hours per week. A back-up professional person will be identified at the site to be available to the student.

The direct day-to-day supervisory responsibilities of the fieldwork educator include, but are not limited to the following:

1. Providing an orientation to the fieldwork education facility and to specific departmental policies and procedures.
2. Assigning the client/clients to the student.
3. Supervision of the student's provision of occupational therapy services, documentation and professional verbal communications.
4. Assessing the skill and knowledge level of the student, with growth-oriented feedback.
5. Meeting with the student regularly to review performance and to provide guidance.
6. Evaluating the student at midterm and completion of the fieldwork experience using the AOTA Fieldwork Performance Evaluation of the Occupational Therapy Assistant Student form provided.

Rules for Fieldwork Clinical Experiences for Occupational Therapy Assistant Students

It is the student's responsibility to know and abide by these rules. In addition, students are subject to and responsible for abiding by the Casper College Conduct and Judicial Code. Violations of the following codes of professional behavior should be brought to the student's attention as they occur and may be grounds for removal from fieldwork sites.

- Failure to maintain and follow OTA Program dress code, demonstrating poor appearance, and/ or hygiene
- Disrespect to superiors or discourteous treatment of others
- Refusal to work in an assigned area
- Non-cooperation in assigned duties or lack of initiative to participate in learning opportunities
- Divulging confidential patient information
- Incompetence, neglect of duty, or poor performance
- Violation of safety rules
- Failure to maintain professional relationships with clients
- Using commonly acknowledged profane language
- Gambling on fieldwork site property
- Assaultive behavior on fieldwork site property
- Possession of drugs, narcotics, or alcohol on fieldwork site property
- Reporting for duty under the influence of drugs, narcotics, or alcohol
- Theft of fieldwork site property, dishonesty, falsifying records, or possession of the fieldwork educator's files or records
- Failure to report for one's scheduled shift without notifying the fieldwork educator in advance
- Leaving the facility premises without notifying the fieldwork educator
- Failure to report to work on time
- Students must have a Grade Point Average (GPA) of 2.3 to participate in **all levels** of fieldwork placements.
- Violations are to be dealt with per facility employee policy. Where no policy exists, contact the academic program for direction.
- All violations of the above listed rules should be brought to the immediate attention of the Casper College Academic Fieldwork Coordinator.

COMMUNITY EXPERIENCE

Community Experience

Community Experience (CE): Community Experience is intended to provide the students with experience and exposure to a variety of helping professions within the community. This experience helps validate the student's decision to pursue a career in occupational therapy. Community Experience will include fieldwork observations and assignments in different practice settings to include mental health, developmental disability, physical disability, geriatric, and/or pediatric populations. Students will complete community experience hours and assignments through video observations, participation in WATR lab and ECHO presentations, attending guest speakers, observations at the Casper College Early Childhood Learning Center (ECLC) and Developmental Disability (DD) sites, attending and participating in mental health presentations and wellness activities, and completion of fieldwork assignments addressing each of the practice settings.

Community Experience Fieldwork is not expected to emphasize independent performance, nor is Community Experience considered substitutes for any part of sustained Level I or Level II Fieldwork experience.

Qualified personnel must provide supervision for Community Experience fieldwork. These personnel may include occupational therapy personnel or other appropriate individuals such as teachers, social workers, nurses, recreational therapists, administrators, and physical therapists.

The fieldwork educational facility/ fieldwork site provides observational opportunities, "hands-on" experience as appropriate, feedback to the student, and learning tasks appropriate for the student. The facility cooperates with academic assignments and provides a written evaluation of the student to Casper College of the experience.

The focus of the learning experience includes observation, written and verbal communication, professional behaviors, and individual and group participation with clients. The fieldwork educational facility provides the opportunity for the following:

- a. basic exposure, observation, and experience with clients commonly served by occupational therapy;
- b. observation and description of treatment, evaluation, and behavior of clients;
- c. recognition and description of conditions of dysfunction;
- d. identification of role functions of the OTR and COTA in various treatment settings. (IF APPLICABLE)

Specific objectives and assignments identified by the Occupational Therapy Assistant Program faculty for Community Experience will be provided by the instructor of COTA 2300 and COTA 2310, and are available in the Program Director's office. If additional assignments are required for students to complete, please contact the AFWC prior to giving the assignment to the student, so the assignment may be reviewed with students and faculty. The OTA Program would like to ensure the students have been prepared in the areas being addressed, so experiences will be successful.

All occupational therapy assistant students are required to participate in and successfully complete the COTA 2300 Fieldwork Integration I and COTA 2310 Fieldwork Integration II courses. These courses require Community Experience where OTA Program faculty and fieldwork educators will evaluate the student's performance and provide comments on various expected professional behaviors that are integral in the occupational therapy field of practice. For Community Experience, the students' performance will be evaluated on the fieldwork assignments and the Professional Behavior rubric completed in each fieldwork course. Students must successfully complete all fieldwork assignments with a score of 75% or higher and demonstrate appropriate professional behaviors in order to pass the course. When students complete Community Experience at the fieldwork site, a student's performance will be evaluated using the Community Experience Evaluation form. On the Community Experience Evaluation form, if at any time a student receives more than

one item below a “2” or more than two items below a “3” on their evaluation, the student is required to meet with the OTA Program faculty and complete a remediation plan of areas of concern prior to repeating the fieldwork experience. The student will be required to repeat the unsuccessful fieldwork rotation, within the semester the failure took place in. Depending on the timing of the fieldwork failure, the student may be required to complete the fieldwork rotation outside of the typical course schedule. In this situation, the student will receive a course grade of Incomplete “I”, until successful completion of the fieldwork experience. Students cannot continue in the OTA Program until all coursework requirements are successfully met. A student may only repeat one fieldwork experience in a course. If a student is required to repeat more than one fieldwork experience in a course due to unsuccessful completion, the student will not pass the fieldwork course. A student may not fail more than one community experience fieldwork in two semesters (COTA 2300 and COTA 2310). If a student fails more than one fieldwork experience in two semesters, the student will be required to meet with the OTA Program faculty and the process of disciplinary action for the OTA students will be followed.

Learning Objectives Community Experience

By the completion of the Community Experience, the student will be able to:

1.0 Professional Behaviors

- 1.1 Respect the rights and dignity of the client
- 1.2 Accept responsibility for his/her own actions
- 1.3 Seek supervision when needed and communicate with onsite supervisor at appropriate intervals
- 1.4 Accept constructive criticism of his/her own performance and make an effort to improve weak areas
- 1.5 Begin to develop professional judgment in treatment related activities
- 1.6 Initiate efforts to upgrade knowledge through available resources
- 1.7 Demonstrate punctuality in attendance and promptness in completing assignments
- 1.8 Exhibit good work habits (i.e.: dependability, flexibility and time management)
- 1.9 Demonstrate professional appearance

2.0 Communication Skills

- 2.1 Establish rapport with clients and staff
- 2.2 Begin to communicate the definition of occupational therapy to others
- 2.3 Give clear, accurate and well-articulated oral directions and reports
- 2.4 Independently initiate contact with clients/staff as needed
- 2.5 Discriminate between the desirable and undesirable client behaviors
- 2.6 Positively reinforce desirable client behaviors
- 2.7 Effectively set limits on undesirable client behaviors
- 2.8 Demonstrate clear, accurate, and grammatically correct clinical writing skills
- 2.9 Use medical terminology effectively

3.0 Occupational Therapy Services

- 3.1 Understand the value of activity/occupation as treatment by describing the activities’ relationship to treatment goals
- 3.2 Demonstrate adherence to the policies, procedures and daily routine of the fieldwork site
- 3.3 Identify functions and responsibilities of occupational therapy personnel in the assigned fieldwork setting (OTR vs. COTA and Senior vs. Staff positions)
- 3.4 Describe the present or potential contribution of occupational therapy to the assigned fieldwork site

3.5 Describe the roles of other allied health professions in the assigned fieldwork site

3.6 Conduct an activity analysis

4.0 Data Collection

4.1 Recognize classic symptoms of diagnoses manifested by clients

4.2 Utilize existing documentation and other resources to obtain relevant information needed for treatment planning

4.3 Identify areas to assess relevant to occupational performance (ADL, leisure, work, etc.)

4.4 Identify psychosocial factors which impact a client's occupational performance

4.5 Utilize existing documentation as an evaluation tool to identify major problems

4.6 Conduct an interview with the client to obtain data

4.7 Observe confidentiality with respect to client-related information

4.8 Observe or assist in assessing relevant areas according to established protocols when the opportunity is available

4.9 Observe or assist in identifying basic client assets and deficits after summarizing evaluation data when the opportunity is available

4.10 Observe or assist in identifying appropriate goals to match client deficits when the opportunity is available

3.0 Treatment Implementation

5.1 Apply or adapt effective techniques/modalities to a client or group

5.2 Become familiar with conditions that are effective for occupational therapy intervention

5.3 Demonstrate effective problem solving

5.4 Be prepared for treatment sessions

5.5 Assist in clinic maintenance

5.6 Verbalize the importance of re-evaluation, discharge planning, and follow-up.

5.7 Note pertinent aspects of client's response to treatment (i.e. physical, emotional)

5.8 Demonstrate awareness of and adherence to safety precautions in implementing treatment

5.9 Become familiar with therapeutic media and techniques used with clients

5.10 Assist in selecting therapeutic activities to match treatment goals

6.0 Self-awareness

6.1 Identify personal strengths and areas of growth

6.2 Verbalize personal growth strategies to supervisor

6.2 Identify personal attitudes toward disability and illness

6.3 Appreciate the impact of cultural and socioeconomic differences on the treatment process

6.4 Demonstrate a range of interpersonal interactions to meet the demands of various clinic situations

6.5 Demonstrate the ability to handle personal problems that could interfere with professional duties

6.6 Appear comfortable with professional physical contact with client

6.7 Demonstrate empathy towards meeting the needs of others

6.8 Demonstrate adherence to professional standards and a code of ethics

Occupational Therapy Assistant Program

COMMUNITY EXPERIENCE FIELDWORK EVALUATION FORM*

Student name: _____

Name of Fieldwork Site: _____

Dates of Fieldwork:

Semester:	[1] Fall	[2] Spring	[3] Summer		
Year:	[1] 2024	[2] 2025	[3] 2026	[4] 2027	[5] 2028
Sequence:	[1] 1 st	[2] 2 nd	[3] 3 rd	[4] 4 th	[5] 5 th
Supervisor:	[1] OTR	[2] COTA	[3] OTS	[4] NON-OT	

Total Number of Hours Completed at facility: _____/4 hours

Directions:

The Standards B.5.17 and B.9.6, developed by the Accreditation Council for Occupational Therapy Education (ACOTE) describes objectives of the occupational therapy assistant experience is for students to effectively interact through oral and nonverbal communication with the health care providers in a professionally acceptable manner. Also students are to identify professional responsibilities. Keeping in mind, the focus of community experience fieldwork is not to be independent performance, but rather to have basic exposure, observation, and experience with clients commonly served in occupational therapy. Please rate the following statements in each category as to your degree of agreement or disagreement concerning the performance of this student. Utilize the descriptors for each item for clarification of expected performance skills.

- During the final fieldwork session, have a conference with the student discussing your evaluation of him/her and his/her completed evaluation of him/herself. Sign both completed forms and return the forms to the Academic Fieldwork Coordinator.

Supervisor Name: _____

Position: _____ OTR: ____ COTA: ____ Other: ____

Absences of Time made up: _____ Reason(s) for: _____

Please use this area for comments:

- (Adapted with permission from the Philadelphia Region Fieldwork Consortium Level One Fieldwork Student Evaluation Form, Journal of Allied Health, Summer 2003, 86, 91). Revised, Casper College Occupational Therapy Assistant Program June 2013.

**CASPER COLLEGE
OCCUPATIONAL THERAPY ASSISTANT PROGRAM
STUDENT FIELDWORK EVALUATION**

COMMUNITY EXPERIENCE

Student name _____ **Site name:** _____

Indicate the student's level of performance using the scale below.

- 1=Well Below Standards:** Performance is weak in most required tasks and activities. Work is frequently unacceptable. Please state comments and examples for reason score was given.
- 2=Below Standards:** Opportunities for improvement exist however student has not demonstrated adequate response to feedback. Work is occasionally unacceptable. Please state comments and examples for reason score was given.
- 3=Meets Standards:** Carries out required tasks and activities. This rating represents good, solid performance and should be used more than all the others.
- 4=Exceeds Standards:** Frequently carries out tasks and activities that surpass requirements. At times, performance is exceptional.
- 5=Far Exceeds Standards:** Carries out tasks and activities in consistently outstanding fashion. Performance is the best that could be expected from any student.

Time Management Skills Consider ability to be prompt, arrive on time, completes assignments on time. Comments:	1 2 3 4 5
Organization Consider ability to set priorities, be dependable, be organized, and follow through with responsibilities. Comments:	1 2 3 4 5
Engagement in the Fieldwork Experience Consider student's apparent level of interest, level of active participation while on site; investment in individuals and treatment outcomes. Comments:	1 2 3 4 5
Self-Directed Learning Consider ability to take responsibility for own learning; demonstrate motivation. Comments:	1 2 3 4 5
Reasoning/Problem Solving Consider <i>emerging</i> ability to use self-reflection, willingness to ask questions; <i>starting</i> to demonstrate basic reasoning. Comments:	1 2 3 4 5
Initiative Consider initiative, demonstrates <i>emerging ability</i> to seek and acquire information from a variety of sources; demonstrates flexibility as needed. Comments:	1 2 3 4 5
Observation Skills Consider <i>emerging</i> ability to observe relevant behaviors for performance areas and performance components and to verbalize perceptions and observations. Comments:	1 2 3 4 5

Student's Response to Supervisor Feedback Consider ability to receive and respond to feedback given by supervisor; seek guidance when necessary; follow proper channels. Comments:	1 2 3 4 5
Verbal Communication and Interpersonal Skills with Patients/Clients/Staff/Caregivers Consider ability to interact appropriately with individuals such as eye contact, empathy, respectfulness, etc.; degree/quality of verbal interactions; use of body language and non-verbal communication; exhibits <i>emerging</i> confidence. Comments:	1 2 3 4 5
Professional and Personal Boundaries Consider ability to recognize/handle personal/professional frustrations; balance personal/professional obligations; handle responsibilities; work with others cooperatively, considerately, effectively; responsiveness to social cues. Comments:	1 2 3 4 5
Safety The student is demonstrating emerging safety needs of the client and the facility. Comments:	1 2 3 4 5

Your comments help the Casper College Occupational Therapy Assistant Program faculty as well as the student understand areas for growth and development in the field of Occupational Therapy. **Please provide examples and comments to sections where the student scored a "1" or "2".**

Identify student's current area of strengths that were demonstrated during fieldwork.

Identify students' current areas in need of improvement that were demonstrated during fieldwork.

1	2	3	4	5	Supervisors' overall rating of student performance. Please indicate student's overall performance score.

Community Experience Time Sheet

Student Name: _____

Facility Name: _____

Fieldwork Educator(s) Name: _____

Directions: The student is to fill in the hours each time the student visits the fieldwork facility. The Fieldwork Educator will sign their name in the space provided after each visit. This form is to be turned in to the instructor, along with the Community Experience Fieldwork Evaluation Form.

Date of Visit	Hour Arrived	Hour Departed	Total Hours for Day	Supervisor Signature

I have honestly completed the required 4 hours of observation at the fieldwork site for the community experience class.

Signature of Student

Signature of Fieldwork Educator

COTA 2300 and COTA 2310
Community Experience Preparation Worksheet Sheet

Directions: Complete the following questions based on the practice settings you are observing. These questions are meant to assist you in gaining an understanding about each of the practice settings listed below. Please utilize your occupational therapy books and the AOTA website to obtain this information prior to beginning your community experience observations and assignments.

Physical Disabilities

_____ (score)

1. What behaviors and symptoms might you see when observing a patient who has sustained a stroke?
2. What is the difference between quadriplegia and paraplegia?
3. What are two activities a person who has had a total hip replacement might not be able to do?
4. What are two activities you could do with a patient who has decreased upper extremity strength?
5. Can a person who has a physical disability, such as a spinal cord injury, live independently or does the person need to live in a facility where they have assistance?

Pediatrics

_____ (score)

1. What behaviors and symptoms might you observe in a child diagnosed with cerebral palsy?
2. What behaviors and symptoms might you observe in a child diagnosed with attention deficit hyperactivity disorder?
3. What are two activities a therapist could use to develop the fine motor skills needed to address a child's difficulty with handwriting?
4. What communication strategies (verbal and non-verbal) does a therapist use to present activities to a child?
5. Are children with physical disabilities allowed in school classrooms with non-disabled children?

Geriatrics

_____ (score)

1. What are two stereotypes that come to mind when considering the elderly population?

2. What are two problems an elderly patient might have that would require OT treatment?
3. What are two activities you could use with elderly patients to improve their balance?
4. What are two activities to help improve memory or problem-solving skills?
5. What are two benefits for the OT, as well as the patient, when therapy is provided in the patient's home?

Developmental Disability

_____ (score)

1. Where do the clients reside at night? Who do the clients live with?
2. What do you notice as one of the major key components for success with clients of the DD population? What skills separate those who can work from those who need daily supervision?
3. What are two activities a therapist would use to develop social skills in the DD population?
4. What professional and personal qualities does the therapist need to have in order to effectively communicate what he/ she wants to accomplish in therapy?
5. What services are provided to facilities to help accommodate the client's families?

Mental Health

_____ (score)

1. What behaviors and symptoms might you observe in a patient diagnosed with schizophrenia?
2. What behaviors and symptoms might you observe in a patient diagnosed with major depression?
3. What are two activities you could use to treat a patient with poor communication skills?
4. What are two activities you could use with a patient who has poor coping skills?
5. How are individuals who are diagnosed with a mental illness stigmatized by society?

LEVEL I FIELDWORK

LEVEL I FIELDWORK

Level I: Level I Fieldwork experience, as required by the Standards for Accredited OTA Programs, established by the Accreditation Council for Occupational Therapy Education (ACOTE), includes experiences designed as an integral part of didactic coursework for the purpose of directed observations and participation in selected activities in fieldwork settings. These settings include traditional settings for pediatrics, mental health, physical disability, geriatrics, adult developmental disabilities, and non-traditional settings and/ or emerging sites.

Level I Fieldwork rotations are not expected to emphasize independent performance, nor are they considered substitutes for any part of sustained Level II Fieldwork experience. Level I Fieldwork placements will be established approximately one month prior to pending fieldwork dates.

Qualified personnel must provide supervision for Level I Fieldwork. These personnel may include occupational therapy personnel or other appropriate individuals such as teachers, social workers, nurses, recreational therapists, administrators, and physical therapists. The Casper College Fieldwork Program Supervision Policy allows up to a 1:2 fieldwork educator to student ratio. This ratio ensures that the ratio of fieldwork educators to students enables proper supervision, and provides protection of consumers, opportunities for appropriate role modeling of occupational therapy practice, and the ability to provide frequent assessment of student progress in achieving the stated fieldwork objectives. (ACOTE C.1.7, ACOTE C.1.10)

Level I Fieldwork experience, which initially provides the student with exposure to clinical practice through observation, progresses with increasing expectations of the student to include demonstrating skills in the use of selected evaluation or treatment procedures; gathering and organizing data; and examining reactions to clients, self, personnel, and the profession. Generally, the clinical facility provides observational opportunities, “hands-on” experiences as appropriate, beginning documentation with review, feedback to the student, and additional learning tasks applicable to clinical practice. The facility cooperates with academic assignments and provides a written evaluation to Casper College of the experience.

The focus of the learning experience includes observation, written and verbal communication, professional behavior, and individual and group participation with clients. The fieldwork education facility provides the opportunity for the following:

1. basic exposure, observation, and experience with clients commonly served by occupational therapy;
2. observation and description of treatment, evaluation, and behavior of clients;
3. recognition and description of conditions of dysfunction;
4. identification of role functions of the OTR and COTA in various treatment settings. (IF APPLICABLE)

Specific objectives and assignments identified by the Occupational Therapy Assistant Program faculty for Level I Fieldwork will be provided by the instructor of COTA 2320 and COTA 2330, and are available in the Program Director’s office. If additional assignments are required for students to complete, please contact the AFWC prior to giving the assignment to the student, so the assignment may be reviewed with students and faculty. The OTA Program would like to ensure the students have been prepared in the areas being addressed, so experiences will be successful.

All occupational therapy assistant students are required to participate in and successfully complete the COTA 2320 and COTA 2330 Fieldwork Integration courses. These courses require Level I Fieldwork rotations in pediatrics, mental health, geriatrics, adult physical disabilities, developmentally delayed, non-traditional and/or emerging sites where fieldwork educators will evaluate the student's performance and provide comments on various expected professional behaviors that are integral in the occupational therapy field of practice. Students will be evaluated using the *AOTA Level I Fieldwork Competency Evaluation for OT and OTA Students* form provided. If at any time a student receives more than two items below a "B- Below Standards" or more than five items below a "M- Meets Standards" on their evaluation, the student is required to meet with the OTA Program faculty and complete a remediation plan of areas of concern prior to repeating the fieldwork experience. The remediation plan will be determined by the OTA Program faculty. The student will be required to repeat the unsuccessful fieldwork rotation, within the semester the failure took place in. Depending on the timing of the fieldwork failure, the student may be required to complete the fieldwork rotation outside of the typical course schedule. In this situation, the student will receive a course grade of Incomplete "I", until successful completion of the fieldwork experience. Students cannot continue in the OTA Program until all coursework requirements are successfully met. A student may only repeat one fieldwork experience in a course. If a student is required to repeat more than one fieldwork experience in a course due to unsuccessful completion, the student will not pass the fieldwork course. A student may not fail more than one Level I fieldwork experience in two semesters (COTA 2320 and COTA 2330). If a student fails more than one fieldwork experience in two semesters, the student will be required to meet with the OTA Program faculty and the process of disciplinary action for the OTA students will be followed.

Due to the geographic location of Casper College, in a rural area, the opportunities for Level I Fieldwork in the immediate area are limited. Travel **WILL** be required outside of Casper and Douglas Wyoming. Travel expenses are the students' responsibility. Four block assignments of five days have been organized for COTA 2320 and 2330. These fieldwork assignments will be in mental health, pediatrics, physical disabilities and geriatrics, in addition to 16-hour placements at a developmental disability setting, and an emerging site and/ or non-traditional setting, which may include developmental disabilities, mental health, geriatrics, or pediatrics.

Fieldwork Placement Designation for Level I

Level I Fieldwork is a part of the academic coursework. The Academic Fieldwork Coordinator and faculty assign placements. Placements for Level I Fieldwork will be completed approximately one month ahead of pending fieldwork dates. Level I Fieldwork placements are the responsibility of the Casper College Occupational Therapy Assistant Program faculty.

Changing Level I Fieldwork Placement for Students

If a student has a hardship regarding their Level I Fieldwork placement, it is imperative to bring the concern to the OTA faculty within three weeks of scheduled fieldwork. In a rare occasion, there may be a situation that requires reassignment of a Level I Fieldwork placement. If a hardship is identified, the student must follow the Fieldwork Hardship Policy and submit their typed request to the Academic Fieldwork Coordinator for review by the FW Committee.

Situations Which May Require Student Removal from Level I Fieldwork by Academic Program

Casper College Occupational Therapy Assistant students are required to have all academic coursework and program requirements turned in prior to leaving for Level I fieldwork placement. If for some reason a student has not turned in an OTA Program assignment or requirement, the student **will not** be allowed to start the

fieldwork until assignments/ requirements are successfully completed. If the student is late with assignments, causing them to not complete the fieldwork at the scheduled time, the student will be placed accordingly in the disciplinary process.

1. Failure to wear and follow Casper College Occupational Therapy Assistant Dress Code policy.
2. All missing and/ or late work must be submitted Thursday by 12:00 pm the week prior to the FW. If the missing and/ or late work is not submitted by this time, the student will not start their fieldwork rotation.
3. Not abiding by the Fieldwork Experience Rules page 34.
4. Non-compliance with Student Success Form (IF APPLICABLE)

Learning Objectives Level I Fieldwork

By the completion of the Level I Fieldwork experience, the student will be able to:

1.0 Professional Behavior

- 1.1 Respect the rights and dignity of the client
- 1.2 Accept responsibility for his/her own actions
- 1.3 Seek supervision when needed and communicate with onsite supervisor at appropriate intervals
- 1.4 Accept constructive criticism of his/her own performance and make an effort to improve weak areas
- 1.5 Begin to develop professional judgment in treatment related activities
- 1.6 Initiate efforts to upgrade knowledge through available resources
- 1.7 Demonstrate punctuality in attendance and promptness in completing assignments
- 1.8 Exhibit good work habits (i.e.: dependability, flexibility and time management)
- 1.9 Demonstrate professional appearance

2.0 Communication Skills

- 2.1 Establish rapport with clients and staff
- 2.2 Communicate the definition of occupational therapy to others
- 2.3 Give clear, accurate and articulate oral directions and reports
- 2.4 Independently initiate contact with clients/staff as needed
- 2.5 Discriminate between the desirable and undesirable client behaviors
- 2.6 Positively reinforce desirable client behaviors
- 2.7 Effectively set limits on undesirable client behaviors
- 2.8 Demonstrate clear, accurate, and grammatically correct clinical writing skills
- 2.9 Use medical terminology effectively

3.0 Occupational Therapy Services

- 3.1 Understand the value of activity/occupation as treatment by describing the activities relationship to treatment goals

- 3.2 Demonstrate adherence to the policies, procedures and daily routine of the fieldwork site
- 3.3 Identify functions and responsibilities of occupational therapy personnel in the assigned fieldwork setting (OTR vs. COTA and Senior vs. Staff Positions)
- 3.4 Describe the OT practitioner's role in addressing psychosocial aspects of the client's engagement in occupations
- 3.5 Describe the present or potential contribution of occupational therapy to the assigned fieldwork site
- 3.6 Describe the roles of other allied health professions in the assigned fieldwork site
- 3.7 Conduct an activity analysis

4.0 Data Collection

- 4.1 Recognize classic symptoms of diagnoses manifested by clients
- 4.2 Utilize existing documentation and other resources to obtain relevant information needed for treatment planning
- 4.3 Identify areas to assess relevant to occupational performance (ADL, leisure, work, etc.)
- 4.4 Utilize existing documentation as an evaluation tool to identify major problems
- 4.5 Conduct an interview with the client to obtain data
- 4.6 Observe confidentiality with respect to client-related information
- 4.7 Observe or assist in assessing relevant areas according to established protocol when the opportunity is available
- 4.8 Observe or assist in identifying basic client assets and deficits after summarizing evaluation data when the opportunity is available
- 4.9 Observe or assist in identifying appropriate goals to match client deficits when the opportunity is available

5.0 Treatment Implementation

- 5.1 Apply or adapt effective techniques/modalities to a client or group
- 5.2 Become familiar with conditions that are effective for occupational therapy intervention
- 5.3 Demonstrate effective problem solving
- 5.4 Be prepared for treatment sessions
- 5.5 Assist in clinic maintenance
- 5.6 Verbalize the importance of re-evaluation, discharge planning, and follow-up.
- 5.7 Note pertinent aspects of client's response to treatment (i.e. physical, emotional)
- 5.8 Demonstrate awareness of and adherence to safety precautions in implementing treatment
- 5.9 Become familiar with therapeutic media and techniques used with clients
- 5.10 Assist in selecting therapeutic activities to match treatment goals
- 5.11 Identify psychosocial factors which impact a client's occupational performance and assist in selecting a client centered, occupation-based intervention to address the factors.

6.0 Self-awareness

- 6.1 Identify personal strengths and areas of growth.
- 6.2 Verbalize personal growth strategies to supervisor
- 6.3 Identify personal attitudes toward disability and illness

- 6.4 Appreciate the impact of cultural and socioeconomic differences on the treatment process
- 6.5 Demonstrate a range of interpersonal interactions to meet the demands of various clinic situations
- 6.6 Demonstrate the ability to handle personal problems that could interfere with professional duties
- 6.7 Appears comfortable with professional physical contact with client
- 6.8 Demonstrate empathy towards meeting the needs of others
- 6.9 Demonstrate adherence to professional standards and code of ethics

Level I Sample Objectives for Fieldwork Educators

Please remember these are only **sample objectives**. Fieldwork sites are encouraged to establish site specific fieldwork objectives in collaboration with the Academic Fieldwork Coordinator.

Day 1

- Orientation to facility, staff, policies and procedures
- Observation of Fieldwork Educator with clients/ beginning interactions when possible
- Chart Reviews- Students start Occupational Therapy Practice Framework and Activity Analysis

Day 2

- Continued observation with staff and clients
- Interactions with clients/ implementation of techniques when possible
- Observe staff meetings/ family conferences
- Discussion of therapy interventions/ evidence-based techniques if applicable
- Initial planning of treatments for clients/ groups when possible

Day 3

- Interaction with clients/ implementation of services when possible
- Documentation with supervision when possible
- Other suggestions
- Time for assignments/ Occupational Therapy Practice Framework
- Observe staff meetings/ family conference
- Observe other disciplines

Day 4

- Implementing student's planned interventions when possible
- Interaction with clients
- Continue documentation

Day 5

- Implementation of student's planned interventions when possible
- Complete Student Evaluation with student
- Complete Fieldwork Evaluation with student
- Wrap up treatments/site expectations

LEVEL I FIELDWORK EVALUATION FORMS AND ASSIGNMENTS

LEVEL I FIELDWORK COMPETENCY EVALUATION FOR OT AND OTA STUDENTS

aota.org

Level I Fieldwork Competency Evaluation for OT and OTA Students

Introduction

The purpose of Level I fieldwork is to provide experiential opportunities for students to gain the performance competency and confidence for progressing successfully in the academic program, including successive Level I and Level II fieldwork.

The *Level I Fieldwork Competency Evaluation for OT and OTA Students* complements the *AOTA Fieldwork Performance Evaluation for the OT Student and for the OTA Student*. It is designed to assess performance skills that build a foundation for successful completion of Level II fieldwork.

This tool is divided into five sections:

- I. Fundamentals of Practice
- II. Foundations of Occupational Therapy
- III. Professional Behaviors
- IV. Screening and Evaluation
- V. Intervention

The first 3 sections are identified as mandatory, as they are applicable to all practice settings and assess basic skills. The last 2 sections are optional, allowing an OT/OTA academic program to select relevant sections for a particular Level I experience in that program. The AFWC should make this clear to the FWEd. The criterion for satisfactory performance is determined by the OT/OTA academic program.

Directions

This tool is to be completed by the identified FWEd for the Level I experience.

The rating scale ranges from

U	Unacceptable	Performance is weak in most required tasks and activities. Work is frequently unacceptable.
B	Below Standards	Opportunities for improvement exist; however, student has not demonstrated adequate response to feedback. Performance is occasionally unacceptable.
M	Meets Standards	Carries out required tasks and activities. This rating represents good, solid performance and should be used most often.
E	Exceeds Standards	Frequently carries out tasks and activities that surpass requirements. At times, performance is exceptional.
O	Outstanding	Carries out tasks and activities in consistently outstanding fashion. Performance is the best that could be expected from any student.

COMMENT REQUIRED FOR ALL ITEMS SCORED "B" or "U."

STUDENT INFORMATION:	
Name: _____ First Middle Last	Date: _____
Site Name: _____	Semester: _____
Student ID: _____	Practice Setting: _____
Student's School: _____	Course Number: _____
Hours Completed: _____	FW Sequence: 1 ☐ 2 ☐ 3 ☐ 4 ☐ 5 ☐ 6 ☐

PRIMARY FWEd INFORMATION	
FWEd Name: _____ First Last Credentials	Past Experience: _____ (# of FWI Stuntents) (# of FWII students)

Years of Experience: _____	☐ OTA: _____
Have you attended the AOTA FWEd Certificate Course? ☐ Yes ☐ No	☐ Other: _____
	☐ if other: _____

Indicate the student's level of performance using the scale below.

U	Unacceptable	Performance is weak in most required tasks and activities. Work is frequently unacceptable.
B	Below Standards	Opportunities for improvement exist; however, student has not demonstrated adequate response to feedback. Performance is occasionally unacceptable.
M	Meets Standards	Carries out required tasks and activities. This rating represents good, solid performance and should be used most often.
E	Exceeds Standards	Frequently carries out tasks and activities that surpass requirements. At times, performance is exceptional.
O	Outstanding	Carries out tasks and activities in consistently outstanding fashion. Performance is the best that could be expected from any student.

COMMENT REQUIRED FOR ALL ITEMS SCORED "B" or "U."

I. FUNDAMENTALS OF PRACTICE

THE STUDENT:	U B M E O
1. Adheres consistently to AOTA's Occupational Therapy Code of Ethics. Follows ethical standards for FW setting. Abides by Health Insurance Portability and Accountability Act (HIPAA) and Family Education Rights and Privacy Act (FERPA). Respects privacy of client. COMMENTS:	
2. Adheres consistently to safety regulations, and uses sound judgment to ensure safety. Follows FW setting's policies and procedures for client safety. Demonstrates awareness of hazardous situations, and reports safety issues to supervisor. COMMENTS:	

II. FOUNDATIONS OF OCCUPATIONAL THERAPY

THE STUDENT:	U B M E O
1. Articulates values and beliefs of occupational therapy. Verbalizes definition of occupational therapy as relevant to FW setting or audience. COMMENTS:	
2. Utilizes relevant evidence to make informed practice decisions. Connects class concepts to FW through inquiry or discussion. Articulates value of using evidence-based practice. Identifies and provides evidence that is relevant to setting or clients. COMMENTS:	

III. PROFESSIONAL BEHAVIOR

THE STUDENT:	U B M E O
1. Time management skills. Consider student's ability to be prompt, arriving and completing assignments on time. COMMENTS:	
2. Organization. Consider student's ability to set priorities, be dependable, be organized, and follow through with responsibilities. COMMENTS:	
3. Engagement in FW experience Consider student's apparent level of interest, level of active participation while on site, and investment in individuals and treatment outcomes. COMMENTS:	
4. Self-directed learning. Consider student's ability to take responsibility for own learning and to demonstrate motivation. COMMENTS:	
5. Reasoning and problem solving. Consider student's ability to use self-reflection; willingness to ask questions; ability to analyze, synthesize, and interpret information; and understand OT process. COMMENTS:	

6. Written communication. Consider student's ability to use proper grammar and spelling, legibility of work, successful completion of written assignments, and documentation skills. COMMENTS:	
7. Initiative. Consider student's initiative, ability to seek and acquire information from a variety of sources, and demonstrate flexibility as needed. COMMENTS:	
8. Observation skills. Consider student's ability to observe relevant behaviors related to occupational performance and client factors and to verbalize perceptions and observations. COMMENTS:	
9. Participation in supervisory process. Consider student's ability to give, receive, and respond to feedback; seek guidance when necessary; and follow proper channels of communication. COMMENTS:	
10. Verbal communication and interpersonal skills with patients/clients, staff, and caregivers. Consider student's ability to interact appropriately with individuals, such as eye contact, empathy, limit-setting, respectfulness, use of authority, and so forth; degree and quality of verbal interactions; use of body language and non-verbal communication; and exhibition of confidence. COMMENTS:	
11. Professional and personal boundaries. Consider student's ability to observe relevant behaviors related to occupational performance and client factors and to verbalize perceptions and observations. COMMENTS:	
12. Use of professional terminology. Therapy Practice Framework terms and OT acronyms/abbreviations) in written and oral communication COMMENTS:	

Copyright © Philadelphia Region Fieldwork Consortium. Used with permission. Direct questions c/o caryn.johnson@jefferson.edu

IV. SCREENING AND EVALUATION (enter N/A = Not Applicable if not required on this placement)

THE STUDENT:	U B M E O
1. Contributes to screening/evaluation process. Communicates observations. Identifies resources for evaluation process. Could include chart review. COMMENTS:	
2. Completes an interview and drafts an occupational profile. COMMENTS:	
3. Identifies potential goals from evaluation process. COMMENTS:	
4. Drafts documentation consistent with practice setting. COMMENTS:	

V. INTERVENTION (enter N/A = Not Applicable if not required on this placement)

THE STUDENT:	U B M E O
1. Contributes to intervention process. Could include preparing clinic area and identifying resources and evidence. COMMENTS:	
2. Identifies interventions consistent with client evaluation and goals. COMMENTS:	
3. Identifies (verbal or written) interventions consistent with client-centered approach, and provides clinical reasoning for interventions identified. COMMENTS:	
4. Engages in and values evidence-based practice by seeking evidence to support or negate intervention approach. COMMENTS:	
5. Administers interventions that are occupation-based and client-centered within guidelines of facility. COMMENTS:	

6. Recognizes (verbal, written, or demonstration) need to modify interventions on basis of client response. COMMENTS:	
7. Recognizes (verbal, written, or demonstration) need to modify or terminate intervention plan on basis of client response. COMMENTS:	
8. Drafts documentation for intervention using typical procedures used in FW practice setting. COMMENTS:

LEVEL I FIELDWORK REFLECTION

1. Think of one word (adjective/verb) you would use to describe your Level I fieldwork experience.
2. How did you take responsibility for your own learning?
3. Describe your strengths during this FW experience.
4. Describe your areas of growth from this FW experience.
5. What do you feel could have been done differently during this FW experience to enhance your learning and what changes will you make for your next FW experience?
6. Reflect on your leadership style and therapeutic use of self during this fieldwork experience. Identify your strengths and areas to improve upon, as they relate to your leadership style.
7. Describe if you had a difficult time communicating with any of the following: clients, care partners, community members, intraprofessionals and/ or interprofessionals. What changes will you make to improve your communication for your next FW?
8. Reflect on the intraprofessional and interprofessional team dynamics you observed and describe how the team worked together to effectively plan, deliver, and evaluate the client. (client safety, timeliness, efficient, effective and equitable).
9. Reflecting on your Level I experience, what additional knowledge or clinical reasoning skills did you gain from this fieldwork experience?
10. Identify three major take-aways from this FW experience.

Level I- Summary of Evidence-based Article

Answer the following questions based upon your article used for the Client Profile Analysis and Synthesis assignment. Discuss your answers with your FW Educator.

1. Identify the name of your article.
2. Identify how this article relates to your Level I Fieldwork rotation (practice area, article, topic and interventions).
3. Identify the findings from this article which support your Level I Fieldwork rotation (specific approaches/interventions/environment).
4. Describe, using professional language, how this research article enhanced your understanding of evidenced-based knowledge and implementation of interventions during your FW experience.
5. Identify how scholarly activities and literature contribute to the OT profession.

Level I- Summary of Client Profile Analysis and Synthesis

1. Identify the major **occupations** that this patient participates in on a daily basis.
2. What are the **occupational needs** of this patient based upon information gathered in the occupational profile?
3. Identify the major **performance skills** that are affecting independence in this patient's life.
4. Identify the major **client factors** that are affecting independence in this patient's life.
5. Identify the major **psychosocial factors** that are affecting independence in this patient's life.
6. Describe the **OT practitioner's role** in addressing psychosocial aspects of the patient's engagement in occupations.
7. Identify **treatment interventions** you would suggest to address the patient's **psychosocial factors**.
8. How could the **interprofessional** and **intraprofessional** healthcare team support the **promotion of health and wellness** for this patient?

LEVEL II FIELDWORK

Level II Fieldwork

The goal of Level II fieldwork is to develop competent, entry-level, generalist occupational therapy assistants. Level II fieldwork must be integral to the Program's curriculum design and must include an in-depth experience in delivering occupational therapy services to clients, focusing on the application of purposeful and meaningful occupations. All academic class work must be completed before a student may participate in the Level II fieldwork courses. The Accreditation Council for Occupational Therapy Education (ACOTE) Standards require Level II fieldwork experience for occupational therapy assistant students. Level II fieldwork will consist of a minimum of 16 weeks full-time Level II Fieldwork, in a minimum of one setting, if it is reflective of more than one practice area, or in a maximum of three different settings. At this time, part-time completion of Level II fieldwork is not available (ACOTE C.1.12). To maintain the quality and effectiveness of student supervision, the fieldwork educator will not exceed supervising more than a 1:2 fieldwork educator to student ratio at any given time (1 Fieldwork Educator: 2 Students). Per the Casper College Fieldwork Program Supervision Policy, this ratio enables proper supervision, provides protection to consumers, provides opportunities for appropriate role modeling of occupational therapy practice, and frequent assessment of student progress in achieving the stated fieldwork objectives (ACOTE C.1.7).

Recommended Level II fieldwork dates are as follows: Upon completion of all academic coursework, students will begin their first Level II fieldwork rotation ten days after the college commencement ceremony in May and will complete eight weeks full-time clinical fieldwork experience. Students will have ten days off between the completion of their first Level II fieldwork rotation before beginning the second Level II fieldwork rotation. The second Level II fieldwork rotation will begin in July with students completing an additional eight weeks full-time clinical fieldwork experience. On occasion, fieldwork sites and/ or students will request an optional time frame, outside of the recommended Level II fieldwork dates, which will be considered by the Academic Fieldwork Coordinator. At this time, part-time completion of Level II fieldwork is not available. Students enrolled in the summer COTA 2550 course will receive a summer semester grade of incomplete "I" until successful completion of the eight-week fieldwork rotation. Upon successful completion of the fieldwork rotation, a final grade of satisfactory "S" will be recorded. If a student completes their second Level II fieldwork rotation by midterms of the fall semester, the student will be eligible for summer graduation. Delayed fieldwork rotation start dates may result in a fall graduation date, impacting a student's ability for a timely graduation and to take the national certification exam (official transcripts required). If a student receives a grade of incomplete "I", it may impact financial aid. Students are strongly encouraged to work with the Financial Aid office.

Students are **not allowed to miss more than two consecutive days** during their Level II Fieldwork placements. Arrangements to make up time missed will be at the fieldwork educator's discretion. In addition to the onsite fieldwork placement, students are also required to participate in and complete weekly online coursework. Homework in the online Moodle course includes weekly discussions and homework assignments that are designed to strengthen the bridge between academics and fieldwork application. Participation and timely completion are required for the student to earn a satisfactory grade. Failure to complete all online assignments and discussions will result in failure of class, regardless of success at the fieldwork site. Online coursework is to be started by the second week of the determined fieldwork date and completed by the final week of Level II Fieldwork rotation. *Failure to comply with fieldwork policies results in termination of fieldwork.*

A student may be allowed to complete **one repeat** fieldwork, if the student meets all expectations determined by faculty and the Occupational Therapy Assistant Program Fieldwork Committee. No student is allowed to do more than one repeat fieldwork.

Requirements established in the ACOTE Guidelines for Level II Fieldwork, specific to occupational therapy assistant students, include documenting and verifying that the student is supervised by a currently licensed or otherwise regulated occupational therapist or occupational therapy assistant (under the supervision of an occupational therapist) who has a minimum of 1 year full-time (or its equivalent) of practice experience as a licensed or otherwise regulated occupational therapist or occupational therapy assistant prior to the onset of the Level II fieldwork. Ensure that the student supervisor is adequately prepared to serve as a fieldwork educator prior to the Level II Fieldwork experience. The supervising therapist may be engaged by the fieldwork site or by the educational program. (ACOTE C.1.13)

The Casper College COTA Program will include:

1. a minimum of 16 weeks fulltime Level II Fieldwork, in a minimum of one setting if it is reflective of more than one practice area, or in a maximum of three different settings. At this time, part-time completion of Level II Fieldwork is not available. (ACOTE C.1.12)
2. All courses that are required for the A.S. in Occupational Therapy Assistant degree are required to be completed no later than the end of the summer semester of the second summer coursework. Failure to follow this progression will result in a delayed start of COTA 2500 and COTA 2550. Students must complete all Level II Fieldwork within 12 months following the completion of all academic portions of the OTA Program.
3. Documenting and verifying that the student is supervised by a currently licensed or otherwise regulated occupational therapist or occupational therapy assistant (under the supervision of an occupational therapist) who has a minimum of 1 year full-time (or its equivalent) of practice experience as a licensed or otherwise regulated occupational therapist or occupational therapy assistant, prior to the onset of the Level II fieldwork. Ensure that the student supervisor is adequately prepared to serve as a fieldwork educator prior to the Level II Fieldwork experience. The supervising therapist may be engaged by the fieldwork site or by the education program. (ACOTE C.1.13)

Fieldwork Placement Designation for Level II Fieldwork

- 1) *Level II Fieldwork* experience is selected through a lottery method. This method provides equal opportunity for all students to choose Level II Fieldwork experiences. A meeting will be held during the first spring semester where lottery numbers will be drawn; the student who is number one will have first choice of the facility he/ she selected and so forth, down the list of students. A student will provide a list of his/ her top two choices for each experience, but no guarantee will be made concerning fieldwork assignments. The AFWC will meet with students to assign placement. Students may complete only one placement in Casper or Douglas, Wyoming. Douglas, Wyoming is considered a local site.
- 2) The following criteria will be implemented in determining Level II Fieldwork placement.
 - a. The student will not be able to complete a Level II Fieldwork placement where the student is/ or has been employed at the fieldwork site or has family members that are currently employed at this site.
 - b. The student will not be able to complete a Level II Fieldwork placement where the student or immediate family members has or had treatment at the facility in the past three years.
 - c. The student is required to complete two successful Level II Fieldwork rotations. These cannot be completed in the same population settings or in facilities that have the same administering body.

- d. The facility offers a variety of diagnoses, evaluations, and treatment interventions that will help to prepare OTA students for success on the National Board of Certification of Occupational Therapy.
 - e. Any occupational therapy assistant student who would like to go to a state outside of the five state areas for their Level II Fieldwork rotation must demonstrate the following professional and academic behaviors, as well as submit a typed petition to the fieldwork committee. The fieldwork committee will then determine if the student demonstrates competent skills for the requested site placement. This is contingent up on the following:
 - Grade point average of 3.0 or above in all OTA coursework.
 - Successful completion of all Level I Fieldwork rotations.
 - Consistently demonstrates professionalism and completes all OTA academic coursework on time, as demonstrated by no more than one student success form and has not been placed on academic or professional probation.
 - If a student has received a student success form, the student follows the guidelines of the established student success form.
 - When absent, initiates completion of missed coursework independently and in a timely fashion.
 - Notification of absence to faculty needs to be completed effectively and efficiently.
 - Consistently demonstrates respect to all classmates and instructors in the Occupational Therapy Assistant Program, as evident by no more than one student success form and/ or no probationary actions throughout the OTA Program.
- 3) It is the student's responsibility to notify the OTA Program Academic Fieldwork Coordinator of any site which may affect the above policy. Failure to comply with requested information could lead to termination of both fieldwork placements and/ or program registration.
 - 4) If a student is experiencing academic or professional expectation difficulties or is on probation, they will be required by the OTA Program to complete their fieldwork within the state of Wyoming or within 300 miles from Casper, Wyoming, and at a site that the Casper College OTA Program currently has a Memorandum of Understanding or Clinical/ Fieldwork Agreement with. This will allow the program faculty to monitor progress of the student.
 - 5) Students must provide their own transportation to and from the fieldwork sites. Neither Casper College nor any of its fieldwork sites accepts liability for the student travel to or from the fieldwork sites or Casper College.
 - 6) The Casper College OTA Program understands that some students may face a hardship for Level II fieldwork travel. Although students may have reasons that travel may not be ideal for fieldwork, students are encouraged to consider the strengths and opportunities fieldwork sites outside of the immediate area have to offer. If a student must stay in a particular geographic area, the option to sit out a rotation always exists for the benefit of the student. Choosing to sit out a rotation will result in a delay of graduation. If a student feels a hardship exists, the student must follow the process below:
 - a. Reflect on whether the issue is a true hardship. Finances are not considered a hardship except under extreme circumstances.
 - b. Complete a letter requesting fieldwork sites within the immediate area and identify reason for hardship for each Level I and/or Level II fieldwork placement.
 - c. The OTA Fieldwork Committee will attempt to meet all hardships, as fieldwork sites are available.

- 7) Level II Fieldwork outside the United States are required to be supervised by an occupational therapist that graduated from a program approved by the World Federation of Occupational Therapists and has one year of experience in the practice prior to the fieldwork experience (ACOTE C.1.16). This fieldwork will not exceed eight weeks. Casper College OTA Program currently only completes FW placements within the United States.

Student Changing or Canceling Fieldwork Experience:

Once the Academic Fieldwork Coordinator has received a signed Level II Reservation Form to complete fieldwork at a facility, this agreement is binding.

If a student has a hardship regarding their Level II Fieldwork placement, it is imperative to bring the concern to the OTA faculty with a minimum of six months of the scheduled fieldwork. On a rare occasion, there may be a situation that requires reassignment of a Level II Fieldwork placement. If a hardship is identified, the student must follow the Fieldwork Hardship Policy and submit their typed request to the Academic Fieldwork Coordinator for review by the FW Committee.

The Process of Scheduling a Student for Repeat Fieldwork

1. A repeat Level II Fieldwork due to failure, termination, withdrawal, or drop is only allowed to do **one repeat**.
2. Once the new site has been determined, the AFWC will contact the fieldwork site and notify the site of the student's request.
3. Students are encouraged to contact the fieldwork site to discuss the circumstances/difficulties surrounding the previous fieldwork.
4. When a **verbal agreement** has been reached by the student and a fieldwork site, the AFWC will negotiate the fieldwork contract and arrange the necessary paperwork for the student's fieldwork experience.

Situations Which May Require Student Removal/ Failure from Level II Fieldwork by Academic Program

- 1) Failure to complete all academic classes prior to fieldwork start date.
- 2) Failure to register for COTA 2500 and/or COTA 2550, four weeks prior to start of fieldwork.
- 3) Not following Casper College Occupational Therapy Assistant Program Dress Code (OTA Program shirts, dress pants, and name tag).
- 4) Failure to follow the Student Fieldwork Responsibilities as stated in the manual.
- 5) Failure to comply with HIPAA and confidentiality requirements per facility standards.
- 6) Not completing and submitting scheduled online academic coursework within the **first two weeks** of fieldwork and not maintaining expectations for online coursework throughout the fieldwork placements. The online fieldwork assignments and discussions for Level II Fieldwork are mandatory. Students should make arrangements for computer access before leaving for fieldwork so they will be able to participate in these fieldwork requirements. This is a vital part of education for the Occupational Therapy Assistant Program. Students who have not completed at least 75% of required assignments and discussions by midterm will be

terminated from their fieldwork site. All assignments and discussions must be completed by the end of the seventh week of fieldwork to receive a passing grade for the placement. The AOTA Fieldwork Performance Evaluation for the OTA Student, AOTA Student Evaluation of Fieldwork Experience, and AOTA Student Evaluation of the Fieldwork Educator are to be submitted to the Academic Fieldwork Coordinator by the third working day after completion of the Level II Fieldwork.

- 8) Not turning in previous Level II Fieldwork Data forms to Academic Fieldwork Coordinator **prior** to start of sequential Level II Fieldwork.
- 9) Not earning a sum score of 91 points or higher, and a score of 3 or higher on items #1, #2 and #3 on the AOTA Fieldwork Performance Evaluation for the OTA Student by end of fieldwork.
- 10) At any time during the fieldwork process, the OTA faculty has the right to terminate the student based on information between the fieldwork educator, the AOTA Fieldwork Performance Evaluation for the OTA Student, and concern from the fieldwork facility.
- 11) Failure to submit an official copy of the AOTA Fieldwork Performance Evaluation for the OTA Student, AOTA Student Evaluation of the Fieldwork Experience, and AOTA Student Evaluation of the Fieldwork Educator to Academic Fieldwork Educator within one week of completion of site.
- 12) Failure to complete Casper College OTA Program End of Fieldwork electronic survey.

Situations Which May Require Student Removal/ Failure from Level II Fieldwork by Fieldwork Educator

- a. The student is not progressing with the site-specific objectives determined by the facility.
- b. Failure of the student to follow safety guidelines with clients and facility standards.
- c. Failure of the student to follow HIPAA guidelines at all times per facility standards.
- d. Failure to complete site-specific assignments.
- e. At any time during the fieldwork process, the fieldwork educator has the right to terminate the student based on the AOTA Fieldwork Performance Evaluation for the OTA Student and concern from fieldwork facility/ staff.

Situations Which May Require Fieldwork Educator to Cancel or Amend Level II Fieldwork

- a. If there is a change to the OTA students Level II Fieldwork schedule, the fieldwork educator is to notify the Casper College Occupational Therapy Assistant Program's Academic Fieldwork Coordinator as early as possible. This will allow for the student to adjust their fieldwork plan.
- b. If there is a change in the fieldwork educator, please notify the Casper College Occupational Therapy Assistant Program's Academic Fieldwork Coordinator as soon as possible. The Academic Fieldwork Coordinator will then discuss with the new fieldwork educator the Level II OTA process including objectives, evaluations, midterm process, etc.

Level II Fieldwork- Specific Learning Objectives

Please refer to the AOTA Fieldwork Performance Evaluation for Occupational Therapy Assistant Students. The following serves as a guide. Upon completion of the Level II Fieldwork experience, the student will be able to display entry-level competencies, specifically:

1.0 Data Gathering/Reporting

- 1.1 Gather appropriate data independently concerning the client from medical records, client/ family interview, observation, and evaluation instruments.

- 1.2 Independently initiate collaboration with the supervisor to accurately select, administer, record and report selected evaluation results according to standardized procedure.
- 1.3 Identify the need for client re-evaluation and treatment program and plan for discharge effectively through modification of treatment plan.
- 1.4 Describe OT practitioner's role in addressing psychosocial aspects of the client's engagement in occupation.
- 1.5 Identify readiness for client discharge to supervisor.

2.0 Treatment

- 2.1 Based on evaluation findings, collaborate with an OTR and the client to develop a treatment plan with realistic long and short-term goals which address the client's needs.
- 2.2 Select and utilize a variety of media and technical skills to implement a goal directed treatment program.
- 2.3 Demonstrate integration of safety awareness in all facets of client treatment.
- 2.4 Identify classic symptoms of diseases and their related treatment precautions.
- 2.5 Assume authority appropriately by effectively managing the client's behavior.
- 2.6 Demonstrate the ability to analyze and grade activities effectively.
- 2.7 Demonstrate the ability to provide individual, as well as group treatments effectively.
- 2.8 Demonstrate the ability to prioritize treatment goals and recognize when treatment is effective or ineffective.
- 2.9 Demonstrate the ability to fabricate or adapt equipment to maximize client's performance.
- 2.10 Identify psychosocial factors which impact a client's occupational performance and create a client centered, occupation-based intervention to address these factors.

3.0 Professional Responsibilities

- 3.1 Demonstrate initiative to expand personal knowledge base.
- 3.2 Demonstrate flexibility and adjust to program pace.
- 3.3 Respect the client's rights to confidentiality, privacy and choice.
- 3.4 Develop a professional identity by appropriately demonstrating professional behaviors, appearance and communication.
- 3.5 Manage and maintain clinic supplies and equipment.
- 3.6 Develop oneself as a therapeutic agent.

4.0 Communication

- 4.1 Demonstrate effective verbal and non-verbal communication skills with clients, families, supervisor, and staff.
- 4.2 Demonstrate effective written communication skills in accordance with the requirements of the facility.
- 4.3 Accurately represent the profession of OT to clients, families, and other intra-professional disciplines within the community.
- 4.4 Verbalize awareness of the different roles of other members in the intraprofessional healthcare team and how they effectively function as a team.

5.0 Supervision

- 5.1 Recognize one's own strengths and limitations, and handle personal and professional problems effectively.

- 5.2 Acknowledge feedback from supervisor and modify behavior accordingly.
- 5.3 Comply with the policies and procedures of the facility.
- 5.4 Demonstrate the ability to effectively collaborate with the supervising OTR.

Sample Fieldwork Level II Weekly Outline for Fieldwork Educator

Level II Fieldwork Students Casper College Occupational Therapy Assistant Program. Please remember these are only **sample objectives**. Fieldwork sites are encouraged to establish site specific fieldwork objectives in collaboration with the Academic Fieldwork Coordinator.

Week 1

- Orientation of facility
- Complete requirements of facility (paperwork)
- Tour of facility
- Observe staff meetings
- Meet treatment team
- Observe treatments/ evaluations
- Review Code of Ethics and Standards of Practice
- Role delineation of OTR and COTA at facility
- Introduction to computer documentation system
- Begin chart reviews and goal reviews of clients
- May begin first treatment with support from supervisor

Week 2

- Continue chart reviews, goal reviews, and review plan of care of clients
- Establish client load of first clients and begin focusing on these clients
- Observation of evaluations and initial documentation
- Establish therapeutic interventions for clients, in collaboration with supervisor, and begin hands-on learning with evaluation/ treatment of clients with support from supervisor
- Begin practicing computerized documentation
- Continue to attend weekly meetings with supervisor to discuss progress, concerns and student goals
- Continue to attend staff meetings and begin to participate in meetings as appropriate
- Start planning assignments (i.e.: evidenced based intervention/research, verbal reports, precautions on various diagnoses, performing an in-service on a certain topic, fabricate a rehab project that the facility would benefit from)

Week 3

- Continue chart reviews, review of goals and plan of care of clients
- Increase client load as appropriate with support from supervisor
- Select, establish, and implement client-centered and occupation-based treatment interventions with clients with supervisor guidance and review
- Continue documenting on clients with supervisor review
- Continue to attend weekly meetings with supervisor to discuss progress, concerns and student goals
- Continue to attend staff meetings and begin to participate in meetings as appropriate

- Describe billing procedure of facility
- Define safety concerns for family and client
- Continue to progress with the above areas identified
- Plan and implement treatment interventions with increased client load
- Student should start to be more independent with chart reviews and review of goals towards treatment implementation
- Student should be doing weekly (if appropriate) hands on learning with evaluations
- Student should document on clients with better precision and meeting facility documentation requirements, supervisor still reviewing
- Student should demonstrate understanding of billing procedure of facility
- Student should start designing or preparing a fieldwork project to present at the end of the fieldwork rotation

Week 4

- Go over midterm results and review with student and supervisor
- Call AFWC for midterm review with student and supervisor
- Continue assisting with evaluations and documenting goals for client
- Continue chart reviews, review of goals, and review plan of care of clients
- Select, establish, and implement client-centered and occupation-based treatment interventions with clients with supervisor review
- Continue documenting on clients with supervisor review with increased speed and efficiency
- Increase caseload, as deemed appropriate for student
- Continue attending meetings and verbalize occupational therapy considerations in meetings

Week 5

- Continue chart reviews, review of goals, and review plan of care of clients
- Continue documenting on clients with supervisor review
- Increase caseload as deemed appropriate for the student. Add more challenging clients to student's case load or clients with a different diagnosis
- Continue to select, establish, and implement client-centered and occupation-based treatment interventions with clients with supervisor review
- Plan in-service presentation, research, projects, etc.
- Continue participation in meetings and voice occupational therapy considerations in meetings
- Continue in-service meeting plan and schedule for following week
- Student should be working on the Occupational Therapy Practice Framework assignment from the OTA program

Week 6

- Continue chart reviews and review of goals
- Continue documenting on clients with supervisor
- Increase caseload as deemed appropriate for student
- Entry-level case load, if possible, and maintain for two weeks
- Perform in-service/ project presentation

Week 7

- Continue to progress with the above areas identified and student should be demonstrating entry level competence
- Perform in-service/ project presentation
- Student should complete the Occupational Therapy Practice Framework assignment from the OTA program

Week 8

- Continue to progress forward with the above areas identified and student should be demonstrating entry level competence
- Turn in all equipment, books, keys, etc.
- Complete and review with student the AOTA Fieldwork Performance Evaluation for the Occupational Therapy Assistant Student
- Complete and review with the supervisor the Supervisor Evaluation of the Fieldwork Experience
- Complete all assignments for fieldwork educator, as well as online course work
- Terminate services with clients
- Wrap up documentation/files

Level II- Policy Regarding Fieldwork Evaluation and Grading

Upon successful completion of academic coursework, each student is expected to successfully complete 16 weeks of fulltime fieldwork. In order to successfully complete fieldwork, the student must have a passing score according to AOTA Guidelines for Performance, Judgment, and Attitude. Scores are determined through evaluation by the AOTA *Fieldwork Performance Evaluation for the Occupational Therapy Assistant Student* (FWPE). A student is considered passing with all items scored to receive a “pass”, a sum score of 91 or above, and a score of 3 or higher on items #1, #2, and #3 on the FWPE. Failure to meet these requirements results in failure of their Level II Fieldwork (ACOTE C.1.15).

Students are enrolled in fieldwork for credit. In order for students to complete the requirements for a grade, the fieldwork educators and students must ensure that both the FWPE and the AOTA *Student Evaluation of Fieldwork Experience* (SEFWE) and the AOTA *Student Evaluation of the Fieldwork Educator* are sent to the Casper College Occupational Therapy Assistant Program AFWC, who is then authorized to send the grade report to the Registrar’s Office to be recorded on the student’s transcript. Grades for fieldwork are “Satisfactory”/ “Unsatisfactory”.

It is the Occupational Therapy Assistant Program’s expectation that students will not experience major difficulties and will successfully complete all fieldwork requirements. However, should the student experience difficulty leading to the discontinuation of fieldwork, the following categories for termination apply as described below.

Level II Fieldwork Termination Policies

If a student fails to obtain a Satisfactory or better in Level II Fieldwork with a final grade of 90 or below, he/she may repeat the fieldwork education course during the following semester, depending upon fieldwork availability and if unanimous affirmation is received from faculty. If this unanimous affirmation is not received, the student will be terminated from the professional program and their registration canceled. A student may be allowed to

complete **one repeat** fieldwork, if the student meets all expectations determined by faculty and the Occupational Therapy Assistant Program Fieldwork Committee. No student is allowed to do more than one repeat fieldwork. The following are the types of termination possible from the fieldwork setting:

Terminated Passing: In this situation, the student, fieldwork educator, and the academic fieldwork coordinator mutually agree at some point prior to the midterm that the student is unable to perform to their potential due to a mismatch of student and facility. The student is permitted to withdraw from the fieldwork or receives an incomplete and is rescheduled immediately for another fieldwork; whichever fits the student most conveniently.

Terminated for Medical Reasons: This may occur at any time during the fieldwork experience in which the student is currently meeting competencies. The student is allowed to withdraw passing or take an incomplete for the course and complete it when he/ she is medically stable, upon recommendation by the referring medical professional.

Terminated Failing: This student is not meeting competencies and receives a non-satisfactory midterm and/ or final evaluation. This would be reflected with an unsatisfactory grade on the student's transcript. In addition, the fieldwork facility may terminate a student at any time whose performance is not competent and threatens the client's treatment/ safety. A student may also terminate at any time due to extenuating circumstances.

Level II Fieldwork Termination Procedures

The student and/ or fieldwork educator may call a meeting to initiate the process. The following is the chain of command:

1. The student and fieldwork educator need to discuss the issues concerning the situation.
2. A Casper College representative will meet with the fieldwork educator and student together or individually. Depending on the geographic location, this meeting may occur on site or via conference call.
3. If it is determined the student will not continue in the fieldwork but will remain in the program, the student will be placed on probation and a remediation plan will be developed at this time. This remediation plan must be successfully completed before the student will be scheduled for an alternative fieldwork. The decision of placement will be made by the faculty to ensure that the student's educational goals will be met. Emphasis will be based upon educational needs rather than geographical location. Requests from the student will be considered but not guaranteed.
4. If the student continues in the present fieldwork, the student may be placed on probation by unanimous vote of the faculty. A structured plan will be developed to monitor the student's progress.
5. If the problems identified are significant enough, the student may be terminated from the program by unanimous vote of the faculty.

Appendix

2023 Accreditation Council for Occupational Therapy Education (ACOTE) Standards for the Occupational Therapy Assistant Student, Effective JULY 31, 2025.

Fieldwork educators are encouraged to review the entire American Occupational Therapy Association Essentials. The following is provided as a guide:

C.1.0. FIELDWORK EDUCATION Fieldwork education is a crucial part of professional preparation and is best integrated as a component of the curriculum design. The fieldwork experience is designed to promote professional reasoning and reflective practice, transmit the values and beliefs that enable ethical practice, and develop professionalism and competence in career responsibilities. Fieldwork experiences should be implemented and evaluated for their effectiveness by the educational institution. The experience should provide the student with the opportunity to carry out professional responsibilities under the supervision of qualified personnel serving as a role model. The academic fieldwork coordinator is responsible for the program's compliance with fieldwork education requirements. The academic fieldwork coordinator will:	
C.1.1	Ensure that the fieldwork experience reflects the sequence and scope of content in the curriculum design, in collaboration with faculty, so that fieldwork strengthens the ties between didactic and fieldwork education.
C.1.2	Document a process that ensures all students have access to site information and requirements, objectives, and performance expectations prior to the start of the fieldwork experience.
C.1.3	Document that academic and fieldwork educators agree on fieldwork objectives prior to the start of the fieldwork experience. Document that all fieldwork experiences include an objective with a focus on the occupational therapy practitioner's role in addressing the psychosocial aspects of the client's engagement in occupation.
C.1.4	Ensure that fieldwork written agreements are sufficient in number and provide varied practice experiences to allow completion of graduation requirements in a timely manner, in accordance with the policy adopted by the program as required by Standard A.3.3.
C.1.5	Responsibilities of the sponsoring institution(s) and each fieldwork site must be clearly documented in the written agreement (electronic agreements and signatures are acceptable). Document the process and criteria for: • Selecting fieldwork sites. • Ensuring valid written agreements are signed by both parties and in effect prior to the onset and through the duration of Level I (e.g., field trip, observation, service-learning activities) and Level II fieldwork experience for all entities outside of the academic program.
C.1.6	Ensure at least one fieldwork experience (either Level I or Level II) has a primary focus on the role of occupational therapy practitioners addressing mental health, behavioral health, or psychosocial aspects of client performance to support their engagement in occupations.
C.1.7	Ensure that the ratio of fieldwork educators to students enables proper supervision and provides protection of consumers, opportunities for appropriate role modeling of occupational therapy practice, and the ability to conduct frequent assessment of student progress in achieving stated fieldwork objectives.

C.1.8	Document a mechanism for evaluating the effectiveness of supervision (Level I and Level II fieldwork). Demonstrate support for enhancing supervision (e.g., materials on supervisory skills, continuing education opportunities, student well-being, cultural humility, and articles on theory and practice).
C.1.9	Document a process for communication with the student and fieldwork educator throughout the fieldwork experience. Ensure all aspects of the student's progress and performance are addressed and the fieldwork educator is aware of resources that support student well-being.
The goal of Level I fieldwork is to introduce students to fieldwork, apply knowledge to practice, and develop understanding of the needs of clients. The academic fieldwork coordinator will:	
C.1.10	Ensure that fieldwork educators who supervise Level I fieldwork are informed of the curriculum and fieldwork program design and affirm their ability to support the fieldwork experience. This must occur prior to the onset of the Level I fieldwork. Examples include, but are not limited to, currently licensed or otherwise regulated occupational therapists and occupational therapy assistants, psychologists, physician assistants, teachers, social workers, physicians, speech-language pathologists, nurses, and physical therapists.
C.1.11	Demonstrate that Level I fieldwork is provided to students and is not substituted for any part of the Level II fieldwork. Document mechanisms for formal evaluation of student performance. Level I fieldwork may be met through one or more of the following instructional methods: • Virtual environments • Simulated environments • Standardized patients • Faculty practice • Faculty-led site visits • Supervision by a fieldwork educator in a practice environment Document that all students have similar Level I fieldwork experiences (e.g., learning activities, objectives, assignments, and outcome measures).
The goal of Level II fieldwork is to develop competent, entry-level, generalist occupational therapy assistants. Level II fieldwork must be integral to the program's curriculum design and must include an in-depth experience in delivering occupational therapy services to clients, focusing on the application of purposeful and meaningful occupation. It is recommended that the student be exposed to a variety of clients across the lifespan and to a variety of settings. The academic fieldwork coordinator will:	
C.1.12	Document a required minimum of 16 weeks' full-time Level II fieldwork. Documentation must specify if part-time completion is available as agreed upon by the site and the program. The length of the part-time program must be equivalent in length to a minimum of 16 weeks full-time. Ensure that the student can complete Level II fieldwork in a minimum of one setting if it is reflective of more than one practice area, or in a maximum of three different settings.
C.1.13	Document and verify prior to the start of the Level II fieldwork that the student is supervised by an occupational therapy practitioner who is: • Adequately prepared to serve as a fieldwork educator. • Currently a licensed or otherwise regulated occupational therapy practitioner.

	Has a minimum of 1 year full-time (or its equivalent) of practice experience as a licensed or otherwise regulated occupational therapy practitioner prior to the onset of the Level II fieldwork. The fieldwork educator may be engaged by the fieldwork site or by the educational program. Document and verify that students completing Level II fieldwork outside of the United States are supervised by an occupational therapist (regardless of title) who graduated from a program accredited by ACOTE, approved by WFOT, or otherwise regulated in the country in which the students are completing fieldwork. The fieldwork educator must have at least 1 year of experience in practice prior to the onset of Level II fieldwork.
C.1.14	Ensure that Level II fieldwork supervision is direct and then decreases to less direct supervision as appropriate for the setting, the severity of the client's condition, and the ability of the student to support progression toward entry-level competence.
C.1.15	Document a mechanism for requiring formal evaluation of student performance on Level II fieldwork.
C. 1.16	Document and verify that supervision provided in a setting where no occupational therapy services exist includes a documented plan for provision of occupational therapy assistant services and supervision by a currently licensed or otherwise regulated occupational therapist or occupational therapy assistant (under the direction of an occupational therapist) with at least 3 years' full-time or its equivalent of professional experience prior to the Level II fieldwork. Supervision must include a minimum of 8 hours of direct supervision each week of the fieldwork experience. An occupational therapy supervisor must be available, via a variety of contact measures, to the student during all working hours. An on-site supervisor designee of another profession must be assigned while the occupational therapy supervisor is off site.

CASPER COLLEGE OCCUPATIONAL THERAPY ASSISTANT PROGRAM
OCCURRENCE REPORT
(to be completed by OTA student)

Occurrence Date: _____ Occurrence Time: _____

Client Sex: ____ M ____ F Client Age: _____

Diagnosis: _____

Location of Occurrence: _____

Is the affected person a: ☐ Client ☐ Student ☐ Visitor ☐ Other: _____

Name of person reporting occurrence: _____

List Witnesses: _____

Check all which apply:

FALLS:

- ☐ Found on floor
- ☐ Assisted to floor
- ☐ Fall from bed
- ☐ Fall from table /equipment
